

TABLE OF CONTENTS

PREFACE	1
I DUALITY OF H_p AND h_q SPACES	
1. The H_p and BMO norms	3
2. The h_q norm	4
3. Fefferman's inequality	6
4. A representation for the functionals on H_p	12
5. A remarkable representation for BMO functions	22
II INEQUALITIES BETWEEN THE SQUARE FUNCTION AND THE MAXIMAL FUNCTION	
1. The equivalence of h_q and κ_q norms	27
2. Proof of the inequalities for $1 \leq p \leq 2$	34
3. Proofs of the auxiliary lemmas	41
4. A further characterization of BMO functions	48
5. Square function inequalities for supermartingales and Burkholder's weak- L_1 inequality	58
III BMO SEQUENCES AND POTENTIALS	
1. Exponential bounds for monotone sequences	64
2. Proof of the John-Nirenberg theorem	75
3. H_1 , the $L \log L$ class and an inequality of Doob	81

4. Potentials and a "dual" to Doob's inequality	97
5. On the possibility of extending the definitions of \mathcal{H}_q spaces	114
IV MARTINGALE TRANSFORM TECHNIQUES	
1. The space \mathcal{H}_1^- and its relation to \mathcal{P} and \mathcal{H}_1	124
2. The spaces \mathcal{P}_p , \mathcal{H}_p^+ and a further generalization of Fefferman's inequality	130
3. L_p estimates between f^* and the conditional square function	142
4. Relations amongst \mathcal{P}_p spaces and further remarks.	148
NOTATION AND BASIC DEFINITIONS	163
INDEX TO THE INEQUALITIES	167
NOTEWORTHY RESULTS AND REMARKS	173
BIBLIOGRAPHY	181
