

CONTENTS

Preface	vii
1 Elements of the Theory	1
1.1 Some Notions of Functional Analysis	1
1.2 Principal Methods of Defining Integral Transforms of Generalized Functions	5
1.3 Asymptotic Expansions	6
2 The Fourier Transformation	19
2.1 Introduction	19
2.2 The Fourier Transformation in $\mathcal{S}'(\mathbf{R}^n)$	20
2.3 The Fourier transformation in $\mathcal{D}'(\mathbf{R}^n)$ and in $\mathcal{L}'(\mathbf{R}^n)$	22
2.4 Other Definitions	24
3 The Laplace and Mellin Transformations	27
3.1 Introduction	27
3.2 The Right-Sided Laplace Transformation	28
3.3 The Left-Sided Laplace Transformation	32
3.4 The Two-Sided Laplace Transformation	32
3.5 The Multidimensional Laplace Transformation	38
3.6 The Mellin Transformation	41
4 The Stieltjes, Hilbert and Related Transformations	47
4.1 The Stieltjes Transformation	47
4.2 The Stieltjes Transformation with Exponent ρ	49
4.3 The Hilbert Transformation	58
4.4 The Approximative Hilbert Transformation	62
4.5 The Potential Hankel Transformation	64
4.6 The S_2 -Transformation	66

5	The Weierstrass Transformation	67
5.1	The One-Dimensional Weierstrass Transformation	67
5.2	The Multidimensional Weierstrass Transformation	71
6	The Bessel Transformations	73
6.1	Introduction	73
6.2	The Hankel Transformation	73
6.3	The Multidimensional Hankel Transformation	82
6.4	The Hankel-Schwartz Transformation	83
6.5	The Finite Hankel Transformations	85
6.6	The I -Transformation	88
6.7	The K -Transformation	89
6.8	The Hardy Transformation	93
6.9	The Kontorovich-Lebedev Transformation	95
6.10	The Weber Transformation	99
6.11	The Weierstrass-Hankel Transformation	100
6.12	The Poisson-Laguerre Transformation	102
6.13	The Laplace-Hankel Transformation	104
6.14	The Finite Hankel-Laplace Transformation	106
7	Transformations Involving Hypergeometric Functions	109
7.1	The Varma Transformation	109
7.2	The Meijer Transformation	110
7.3	The Generalized Whittaker Transformation	113
7.4	The Generalized Stieltjes Transformation	114
7.5	The ${}_1F_1$ -Transformation	115
7.6	The Multidimensional ${}_1F_1$ -Transformation	117
7.7	The Ei-Transformation	118
7.8	The D_ν -Transformation	119
7.9	The Mehler-Fock Transformation	120
7.10	The Continuous Jacobi Transformation	125
7.11	The Transformations Involving ${}_2F_1(a, b; c; x)$	127
8	The G- and H-transformations	131
8.1	The G -Transformation	131
8.2	The H -Transformation	135

9 Other Transformations	138
9.1 Fractional Integrals	138
9.2 The Convolution Transformation	143
9.3 The Hankel Convolution Transformation	144
9.4 The Laguerre and Hermite Transformations	146
10 Tables of Fourier Transforms	148
10.1 Algebraic and related functions	148
10.2 Step functions and related functions concentrated on $(0, \infty)$	178
10.3 Step functions and related functions concentrated on $(-\infty, \infty)$	198
10.4 Exponential function	227
10.5 Logarithmic function	231
10.6 Trigonometric functions	246
10.7 Series including δ -functions	281
10.8 Functions of the form $f(t + i0)$	284
10.9 Some functions in \mathbf{R}^n	290
11 Tables of Right-sided Laplace Transforms	297
11.1 Delta-function, algebraic and related functions	297
11.2 Logarithmic and related functions	303
11.3 Trigonometric functions	306
11.4 Some special functions	309
References	316
List of Notation	334
Author Index	337
Subject Index	340
