

## CONTENTS

|   |                 |
|---|-----------------|
| <i>Preface</i>                                  | <i>page</i> vii |
| 1. Elementary bounds for univalent functions    | 1               |
| 2. The growth of finitely mean valent functions | 17              |
| 3. Means and coefficients                       | 41              |
| 4. Symmetrization                               | 58              |
| 5. Circumferentially mean $p$ -valent functions | 94              |
| 6. The Löwner theory                            | 117             |
| <i>Bibliography</i>                             | 145             |
| <i>Appendix</i>                                 | 148             |
| <i>Index</i>                                    | 150             |
