CONTENTS

Chapter I. Spread manifolds

§ 1. Morphisms p. 5 - 7
§ 2. Maximal extensions p. 7 - 9
§ 3. Separation properties p. 9
§ 4. Univalent extensions p. 9-10

Chapter II. Natural Frechet spaces p. 11-14

Chapter III. Analytic mappings

§ 1. Basic properties p. 15-20
§ 2. Remarks about analytic extensions p. 20-23

Chapter IV. Frechet spaces of complex analytic mappings

§ 1. Strong invariance by derivation p. 24-26
§ 2. A general type of strongly invariant by derivation Frechet spaces p. 26-29
§ 3. Analytic extensions p. 29-31
§ 4. Characterisation of maximal analytic extensions p. 31-36

Chapter V. Holomorphic convexity

§ 1. Bishop's lemmas p. 37-39
§ 2. Holomorphic convexity p. 40-44

Chapter VI. Spectrum and maximal extensions

§ 1. Manifold structure and spectrum p. 45-48
§ 2. Topological spectrum and maximal extensions p. 48-53
§ 3. A particular case : $\mathbb{C}^I$ p. 53-56

Chapter VII. Extension of vector valued analytic mappings

§ 1. Vector valued extensions p. 57-58
§ 2. Zorn's theorems p. 58-59
§ 3. Functorial properties p. 59-61
§ 4. Extension of products p. 61-66

Chapter VIII. Polynomial approximation

§ 1. Hilbertian operators p. 67-69
§ 2. A Hörmander's result p. 69-70
§ 3. Runge theorems p. 70-75

Index p. 76-77

Bibliography p. 78-85
