CHAPTER	PAGE
I. ON THE CLOSURE OF $\{e^{\lambda_n z}\}$, I	1
1. Introduction	1
2. A closure theorem for $\lambda_n > 0$	2
3. A closure theorem for $-\infty < \lambda_n < \infty$	5
II. ON THE CLOSURE OF $\{e^{\lambda_n z}\}$, II	12
4. A closure theorem involving Pólya maximum density	12
5. A related gap theorem	14
6. An extension of the closure theorem	16
7. Another type of theorem	19
8. A theorem of Miss Cartwright	20
III. ZEROS OF ENTIRE FUNCTIONS OF EXPONENTIAL TYPE.	25
9. The basic theorem.	25
10. A related function with real zeros.	29
11. Lemmas on the related function	33
12. Proof of the basic theorem	38
13. A related theorem	42
14. Another related theorem.	44
IV. ON NON-HARMONIC FOURIER SERIES.	47
15. Proof of an underlying inequality.	47
16. Proof of the main theorems.	55
17. Proof of a related inequality of Hardy and Levinson	67
V. FOURIER TRANSFORMS OF NONVANISHING FUNCTIONS.	73
18. Introduction	73
19. Proof of the basic theorem	75
20. Related theorems	81
VI. A DENSITY THEOREM OF PÓLYA.	88
21. The density theorem	88
22. A function with zeros having a density	92
VII. DETERMINATION OF THE RATE OF GROWTH OF ANALYTIC FUNCTIONS FROM THEIR GROWTH ON SEQUENCES OF POINTS	100
23. Theorems of V. Bernstein	100
24. A sharper set of theorems	107
25. An extension of a theorem of Iyer	122
VIII. AN INEQUALITY AND FUNCTIONS OF ZERO TYPE.	127
26. Generalization of a problem of Pólya	127
27. Proof of the inequality	135
28. Proof of the theorem on functions of zero type	145
IX. EXISTENCE OF FUNCTIONS OF ZERO TYPE BOUNDED ON A SEQUENCE OF POINTS.	153
29. Statement of the existence theorems	153
30. Lemmas	156
31. Proof of the main theorem	171
X. THE GENERAL HIGHER INDICES THEOREM.	186
32. Introduction	186
33. Reduction to a lemma on biorthogonal functions.	191
34. Proof of the lemma	195

CHAPTER	PAGE
XI. THE GENERAL UNRESTRICTED TAUBERIAN THEOREM FOR LARGER GAPS.	203
35. Reduction of the general theorem to the basic lemma	203
36. Existence of auxiliary functions	207
37. Proof of the basic lemma	213
38. Proofs of the remaining theorems	218
XII. ON RESTRICTIONS NECESSARY FOR CERTAIN HIGHER INDICES THEOREMS.	229
39. A restricted higher indices theorem	229
40. Proof of the theorem	231
APPENDIX.	243
41. Theorems used	243
