Foreword to the Revised Edition	vii
Foreword	ix
Preface	xi
Chapter 1. Preparation from Valuation Theory	1
§1. Valuations and prime divisors	1
§2. The metric induced by a valuation	11
§3. Extension and projection of prime divisors	19
Chapter 2. Algebraic Theory of Algebraic Function Fields	33
§1. Algebraic function fields	33
§2. Prime divisors on algebraic function fields	35
§3. Divisors on algebraic function fields	42
§4. Idele and differential	52
§5. Hasse differential	61
§6. Applications of the Riemann-Roch theorem	74
§7. Special function fields	78
Chapter 3. Riemann Surfaces	89
§1. Riemann surfaces and analytic mappings	89
§2. Functions on a Riemann surface	94
§3. Differentials and integrals on Riemann surfaces	97
§4. Existence of analytic functions	104
§5. Covering Riemann surfaces	123
§6. Simply connected Riemann surfaces and canonical forms of Riemann surfaces	130
Chapter 4. Algebraic Function Fields and Closed Riemann Surfaces	147
§1. The Riemann surface for an algebraic function field	147
§2. Analytic function fields on closed Riemann surfaces	156
§3. Topological properties of closed Riemann surfaces	167

Chapter 5. Analytic Theory of Algebraic Function Fields	175
§1. Abelian integrals	175
§2. Additive functions and multiplicative functions	193
§3. Theorems of Abel-Jacobi and Abelian functions	213
§4. Extension fields	231
§5. Elliptic function fields	242
Appendix	265
§1. Finitepotent map and its trace	265
§2. The differential and its residue	269
§3. Differentials and residues in an algebraic function field	276
Subject Index	285
