PREFACE

NOTATION

CHAPTER I. ELEMENTARY THEORY

§ 1.1	Basic properties of $\zeta(s)$	1
§ 1.2	Elementary mean value theorems	4
§ 1.3	Bounds over short intervals	9
§ 1.4	Lower bounds for mean values over short intervals	15
	NOTES	19

CHAPTER II. THE ERROR TERMS IN MEAN SQUARE FORMULAS

§ 2.1	The mean square formulas	27
§ 2.2	The beginning of proof	30
§ 2.3	Transformation of the expressions for the error terms	35
§ 2.4	Evaluation of some exponential integrals	46
§ 2.5	Completion of the proof of the mean square formulas	50
§ 2.6	The mean square formula for $E(T)$	58
§ 2.7	The upper bounds for the error terms	74
§ 2.8	Asymptotic mean square of the product of the zeta-function and a Dirichlet polynomial	91
	NOTES	95

CHAPTER III. THE INTEGRALS OF THE ERROR TERMS IN MEAN SQUARE FORMULAS

§ 3.1	The formulas for the integrated error terms	101
-------	---	-----

§3.2	The omega-results	121
§3.3	The mean square formulas	142
§3.4	The zeros of $E(T) - x$	146
§3.5	Some other results	152
	NOTES	161

CHAPTER IV. A GENERAL STUDY OF EVEN MOMENTS

§4.1	The error term for the $2k$ -th moment	165
§4.2	The approximate functional equation	171
§4.3	Evaluation of $I_k(T)$	180
§4.4	Evaluation of the first main term	189
§4.5	The mean square formula	196
§4.6	The fourth power moment	203
§4.7	The sixth power moment	214
	NOTES	219

CHAPTER V. MOTOHASHI'S FORMULA FOR THE FOURTH MOMENT

§5.1	Introduction and statement of results	224
§5.2	Analytic continuation	231
§5.3	Application of spectral theory and Kuznetsov's trace formula	240
§5.4	Further analytic continuation and the explicit formula	254
§5.5	Deductions from the explicit formula	263
§5.6	Upper bounds	282
§5.7	The omega-result	295
	NOTES	311

CHAPTER VI. FRACTIONAL MEAN VALUES

§6.1	Upper and lower bounds for fractional mean values	317
§6.2	An asymptotic formula for mean values	330
§6.3	The value distribution on the critical line	334
§6.4	Mean values over short intervals	339
	NOTES	347
	REFERENCES	350
