

Table of Contents

| | |
|---|-----|
| § 1. Basic definitions | 1 |
| § 2. Cylinders | 8 |
| § 3. Increasing σ -fields | 15 |
| § 4. Conditional expectations | 17 |
| § 5. Ergodicity of the transformation | 22 |
| § 6. Existence of an equivalent invariant measure | 23 |
| § 7. The ergodic theorem | 28 |
| § 8. Kuzmin's theorem | 34 |
| § 9. Convergence results | 42 |
| §10. The Borel-Cantelli lemma of Schmidt-Philipp | 49 |
| §11. Some extensions of Kuzmin's theorem | 54 |
| §12. Outer measures | 56 |
| §13. Hausdorff measures | 60 |
| §14. Hausdorff dimension | 63 |
| §15. Billingsley dimension | 65 |
| §16. Comparison theorems | 68 |
| §17. The main theorem of dimension theory of Jacobi algorithm | 75 |
| §18. Further results on Billingsley dimension | 85 |
| §19. Ergodic invariant measures | 90 |
| §20. Volume as approximation measure | 94 |
| §21. Proof of the conjecture for $n=1$ and $n=2$ | 99 |
| Appendix I . Appendix II | 105 |
| References | 106 |
