

# CONTENTS

## I. DEGREE OF RATIONAL APPROXIMATION

by TORD GANELIUS . . . . .	9
Chapter 1 INTRODUCTION . . . . .	11
Chapter 2 APPROXIMATION BY RATIONALS WITH FIXED POLES TO FUNCTIONS HOLOMORPHIC ON FABER SETS . . . . .	16
Chapter 3 RATIONAL APPROXIMATION OF HOLOMORPHIC FUNCTIONS AND ZOLOTAREV'S THIRD PROBLEM . . . . .	29
Chapter 4 ORTHOGONAL POLYNOMIALS AND RATIONAL APPROXIMATION OF FUNCTIONS OF STIELTJES TYPE . . . . .	46
Chapter 5 RATIONAL APPROXIMATION OF FUNCTIONS WITH A SINGULARITY ON THE BOUNDARY OF THE SET OF APPROXIMATION . . . . .	54
Chapter 6 SOME REMARKS ON RATIONAL APPROXIMATION TO $\exp(-x)$ ON $[0, \infty)$ . . . . .	66
REFERENCES . . . . .	74

## II. VALUE DISTRIBUTION AND EXCEPTIONAL SETS

by WALTER K. HAYMAN . . . . .	79
PREFACE . . . . .	81
1. Introduction . . . . .	83

2. Growth of $m(r,a)$ outside small sets of $a$ . . . . .	84
3. Statement of results in the opposite direction . . . . .	98
4. A general class of examples . . . . .	100
5. Proof of Theorem 5 . . . . .	103
6. Proof of Theorem 6 . . . . .	109
7. Borel directions of functions meromorphic in an angle . . . . .	112
8. Exceptional values for functions in an angle . . . . .	129
REFERENCES . . . . .	147

### III. RATIONAL APPROXIMATION VERSUS FAST COMPUTER METHODS

by DONALD J. NEWMAN . . . . .	149
Lecture 1 RATIONAL APPROXIMATION TO $e^x$ , UPPER BOUNDS . . . . .	151
Lecture 2 LOWER BOUNDS . . . . .	157
Lecture 3 "EASY" COMPUTATIONS . . . . .	163
Lecture 4 $e^x$ IS AN EASY FUNCTION . . . . .	168
REFERENCES . . . . .	174
