	<i>Preface</i>	<i>page xi</i>
<b>I</b>	<b>An Overview of Circle Packing</b>	1
1	A Circle Packing Menagerie	3
	1.1. First Views	3
	1.2. A Guided Tour	6
2	Circle Packings in the Wild	15
	2.1. Basic Bookkeeping	15
	2.2. The Storyline	17
	Practicum I	29
	Notes I	31
<b>II</b>	<b>Rigidity: Maximal Packings</b>	33
3	Preliminaries: Topology, Combinatorics, and Geometry	35
	3.1. Surfaces and Their Triangulations	35
	3.2. The Classical Geometries	39
	3.3. Circles, Automorphisms, Curvature	48
	3.4. Riemann Surfaces	49
4	Statement of the Fundamental Result	51
5	Bookkeeping and Monodromy	54
	5.1. Bookkeeping	54
	5.2. The Monodromy Theorem	58
6	Proof for Combinatorial Closed Discs	62
	6.1. A Mind Game	62
	6.2. Monotonicities and Bounds	63
	6.3. The Hyperbolic Proof	66
7	Proof for Combinatorial Spheres	72
8	Proof for Combinatorial Open Discs	73
	8.1. Existence and Univalence	73
	8.2. Completeness	81
	8.3. Uniqueness	95
	8.4. Proof of Lemma 8.7	112

9	Proof for Combinatorial Surfaces	116
	9.1. A Discrete Torus	116
	9.2. A Classical Torus	118
	9.3. The Proof	120
	9.4. One Final Example	125
	Practicum II	126
	Notes II	129
<b>III</b>	<b>Flexibility: Analytic Functions</b>	131
10	The Intuitive Landscape	133
	10.1. Think Geometry!	134
	10.2. Fundamentals	135
	10.3. Discrete Analytic Functions	136
	10.4. Discrete Conformal Structures	137
11	Discrete Analytic Functions	139
	11.1. Formal Definitions	139
	11.2. Standard Mapping Properties	140
	11.3. Branching	141
	11.4. Boundary Value Problems	143
	11.5. The Maximum Principle	149
	11.6. Convergence	150
12	Construction Tools	153
	12.1. Cutting Out	153
	12.2. Slitting	153
	12.3. Combinatorial Pasting	154
	12.4. Doubling	156
	12.5. Combinatorial Welding	156
	12.6. Geometric Pasting	157
	12.7. Schwarz Doubling	158
	12.8. Refinement, etc.	158
13	Discrete Analytic Functions on the Disc	160
	13.1. Schwarz and Distortion	160
	13.2. Discrete Univalent Functions	161
	13.3. Discrete Finite Blaschke Products	163
	13.4. Discrete Disc Algebra Functions	167
	13.5. Discrete Function Theory	169
	13.6. Infinite Combinatorics	173
	13.7. Experimental Challenges	176
14	Discrete Entire Functions	181
	14.1. Liouville and (Barely) Beyond	181
	14.2. Discrete Polynomials	182
	14.3. Discrete Exponentials	188
	14.4. The Discrete Error Function	189

14.5. The Discrete Sine Function	192
14.6. Further Examples?	194
15 Discrete Rational Functions	195
15.1. Basic Theory	195
15.2. A Fortuitous Example	196
15.3. Special Branched Situations	197
15.4. Range Constructions	199
16 Discrete Analytic Functions on Riemann Surfaces	201
16.1. Ground Rules	201
16.2. Discrete Branched Coverings	202
16.3. Discrete Belyĭ Functions	209
16.4. Further Examples	211
16.5. Alternate Notions of “Circle Packing”	213
17 Discrete Conformal Structure	217
17.1. A Key Example	217
17.2. Discrete Formulation	219
17.3. Extremal Length	220
17.4. The Type Problem	225
17.5. Packable Surfaces	229
18 Random Walks on Circle Packings	232
18.1. Random Walks and Electrical Networks	232
18.2. Technical Background	233
18.3. Random Walks and “Type”	234
18.4. Completion of a Proof	237
18.5. Geometric Walkers	240
18.6. New Intuition?	241
Practicum III	243
Notes III	245
<b>IV Resolution: Approximation</b>	247
19 Thurston’s Conjecture	249
19.1. Geometric Ingredients	250
19.2. Proof of the Rodin–Sullivan Theorem	251
19.3. Example	254
20 Extending the Rodin–Sullivan Theorem	257
20.1. Outline	258
20.2. Proving the Lemmas	259
20.3. The Ratio Functions	263
20.4. Companion Notions	264
20.5. The He–Schramm Theorem	266
21 Approximation of Analytic Functions	268
21.1. Approximating Blaschke Products	268

21.2.	Approximating Polynomials	271
21.3.	Further Examples	272
22	Approximation of Conformal Structures	275
22.1.	Polyhedral Surfaces	275
22.2.	The Ten-Triangle-Toy	276
22.3.	Convergence	277
22.4.	More General in Situ Packings	281
23	Applications	286
23.1.	“ <i>Dessins d’Enfants</i> ” of Grothendieck	286
23.2.	Conformal Tilings	290
23.3.	Conformal Welding	295
23.4.	Brain Flattening	299
23.5.	Summary	302
	Practicum IV	303
	Notes IV	306
	Appendix A. Primer on Classical Complex Analysis	309
	Appendix B. The Ring Lemma	318
	Appendix C. Doyle Spirals	322
	Appendix D. The Brooks Parameter	327
	Appendix E. Inversive Distance Packings	331
	Appendix F. Graph Embedding	335
	Appendix G. Square Grid Packings	339
	Appendix H. Schwarz and Buckyballs	343
	Appendix I. CirclePack	346
	<i>Bibliography</i>	347
	<i>Index</i>	354
