

CONTENTS

INTRODUCTION	v
LIST OF SYMBOLS	xi
CHAPTER I.- ALGEBRAS OF HOLOMORPHIC FUNCTIONS WITH RESTRICTED GROWTH	
1.1. Basic definitions	1
1.2. Weight functions	2
1.3. Elementary properties	3
1.4. Regularization of weight functions	5
1.5. Inductive limits	8
Notes	11
CHAPTER II.- BOUNDEDNESS AND POLYNORMED VECTOR SPACES	
2.1. Polynormed vector spaces	12
2.2. Convex bounded structures	14
2.3. Completeness	16
2.4. Closure and density	18
2.5. Algebras and ideals	18
Notes	21
CHAPTER III.- SPECTRAL THEORY OF b-ALGEBRAS	
3.1. Spectrum of elements in a Banach algebra	23
3.2. Spectral sets	25
3.3. Spectral functions	28
3.4. The holomorphic functional calculus	30
3.5. Spectral theory modulo a b-ideal	37
Notes	39
CHAPTER IV.- SPECTRAL THEOREMS AND HOLOMORPHIC CONVEXITY	
4.1. Preliminaries	41
4.2. Spectral sets for z in $\mathcal{O}(\delta)$	43
4.3. Spectral functions for z in $\mathcal{O}(\delta)$	47
4.4. Plurisubharmonic regularization	49
4.5. Domains of holomorphy	51
4.6. Bounded multiplicative linear forms	52
Notes	53

CHAPTER V.- DECOMPOSITION PROPERTY FOR ALGEBRAS OF
HOLOMORPHIC FUNCTIONS

5.1. Preliminaries	55
5.2. Decomposition property for $\mathcal{O}(\delta)$	58
5.3. Decomposition property for subalgebras	59
5.4. Spectral functions for z	61
5.5. Convexity with respect to algebras of holomorphic functions ..	63
5.6. Ideals of holomorphic functions	64
Notes	67

CHAPTER VI.- APPROXIMATION THEOREMS

6.1. Approximation on compact sets	68
6.2. Runge domains and generalizations	70
6.3. Basic approximation theorem	72
6.4. Approximation with growth	73
Notes	76

CHAPTER VII.- FILTRATIONS

7.1. Filtrated b -algebras	77
7.2. Spectral theorem with filtration	78
7.3. Application to plurisubharmonic functions	82
7.4. Approximation theorems with filtration	84
7.5. Polynomially convex open sets	88
Notes	89
