PREFACE	iii
1. TOPOLOGICAL RESULTS	1
1.1 Elementary Considerations	1
1.2 A Metrization Theorem	10
1.3 The Index of a Nonarchimedean Space	18
1.4 Local Compactness	21
Exercises 1	26
2. COMPLETENESS	28
2.1 Spherical Completeness and Pseudo-Completeness	29
2.2 Countable Linear Compactness	38
2.3 Maximal Completeness and Pseudo-Completeness	41
2.4 The Existence of a Maximal Completion	47
2.5 F -Convexity and c -Compactness	55
Exercises 2	59
3. NORMED LINEAR SPACES	65
3.1 The Residue Class Space	65
3.2 Local Compactness	70
3.3 The Hahn–Banach Theorem	74

3.4	The Banach–Steinhaus Theorem	83
3.5	Completely Continuous Operators and the Fredholm Alternative Theorem	85
3.6	The Resolvent Set of a Linear Operator	91
	Exercises 3	93
4.	NORMED ALGEBRAS	101
4.1	Normed Algebras; Mazur–Gelfand Theorem	101
4.2	The Spectrum	110
4.3	Maximal Ideals	115
4.4	The Gelfand Subalgebra	117
4.5	Topologizing the Maximal Ideals	121
4.6	Regular Algebras	128
4.7	Algebraic Algebras	140
4.8	V^* -Algebras	147
4.9	Function Algebras	150
4.10	The Tietze Extension Theorem and Stone–Weierstrass Theorem	157
4.11	Representation Theorems	163
	Exercises 4	165
	APPENDIX: EXAMPLES	169
	REFERENCES	178
	INDEX OF SYMBOLS	187
	INDEX	189
