

# CONTENTS

Preface. . . . .	ix
1. Bounded operators in Hilbert space. . . . .	1
2. Functional calculus for bounded and unbounded self-adjoint operators . . . . .	11
3. Spectral measures and unitary groups . . . . .	25
4. Vector and operator-valued functions on the line. . . . .	37
5. Spectral representation of self-adjoint and unitary operators . . . . .	46
6. Shift operators and applications. . . . .	56
7. Continuous shifts and applications. . . . .	67
8. Positive measures and harmonic functions . . . . .	78
9. Dissipative operators . . . . .	89
10. Characteristic functions . . . . .	99
11. Factorization and invariant subspaces. . . . .	108
Notes and Bibliography. . . . .	119
Notation. . . . .	125
Index . . . . .	127
