

CONTENTS

§1. \bar{P} -reflections	1
§2. Realcompact Spaces and Topologically Complete Spaces..	13
§3. Metric Spaces	21
§4. X as a Subset of βX ; Locally Finite Covers	29
§5. Tamano's Theorem	37
§6. The Katětov-Shirota Theorem	43
§7. On the Relations $P(X \times Y) = PX \times PY$	49
§8. Absolute (Separable, Metrizable) Borel Spaces	59
§9. Topological Properties of Baire Sets	69
Perfect Functions	71
Inherited Properties of Baire Sets	75
Some Product-space Theorems	81
Closed Baire Sets	83
§10. Local Connectedness in βX	85
§11. Some Miscellaneous Examples	91
Notes and References	103
Bibliography	111
Index of Symbols and Terms	125
