

CONTENTS

CHAPTER 0. GENERAL NOTATIONS	1
CHAPTER 1. SCHWARTZ SPACES	
1.1 Precompact linear mappings	8
1.2 Precompact seminorms and Schwartz spaces	14
1.3 Precompact-bounded linear mappings	24
1.4 Properties of Schwartz spaces	29
1.5 Universal Schwartz spaces	48
CHAPTER 2. VECTOR SEQUENCE SPACES AND ABSOLUTELY SUMMING MAPPINGS	
2.1 Locally convex topologies on vector sequence spaces	52
2.2 Absolutely summing mappings	69
2.3 Duality theorems in sequence spaces	86
2.4 λ -summability of sequences	110
CHAPTER 3. NUCLEAR SPACES	
3.1 Nuclear linear mappings	133
3.2 Prenuclear seminorms and nuclear spaces	146
3.3 Prenuclear-bounded linear mappings	156
3.4 Quasi-nuclear-bounded linear mappings	161
3.5 Properties of nuclear spaces	175
3.6 Nuclearity of Köthe spaces	190
3.7 Universal nuclear spaces	215
3.8 Supplements - Nuclearity associated with a G_∞ -space	224
CHAPTER 4. TENSOR PRODUCTS	
4.1 The π -norm and the ϵ -norm on a tensor product	233
4.2 The s -norm on tensor products	273
4.3 Linear mappings of finite rank	288
4.4 Locally convex tensor products	300

4.5	Tensor product mappings	318
4.6	Criteria for nuclearity	331

CHAPTER 5. TENSOR PRODUCTS OF ORDERED CONVEX SPACES

5.1	The ℓ -norm on tensor products	343
5.2	The projective cone and biprojective cone	358
5.3	The ordered projective topology and ordered biprojective topology	374
