Preface	iii
Introduction	ix
Chapter I: The categories Ban and \underline{W}	1
§ 1 The categories Ban_1 and $\text{Ban}_{\mathcal{O}}$	1
§ 2 The category $\underline{W} = \text{Ban}_1^{\text{op}}$	25
Exercises	46
Chapter II: Tensor products of Banach spaces	47
§ 1 The algebraic and the projective tensor product	47
§ 2 General tensor products of Banach spaces	61
§ 3 The approximation property for Banach spaces	75
Exercises	97
Chapter III: Banach modules	99
§ 1 Banach algebras and Banach modules	99
§ 2 Banach module homomorphisms	113
§ 3 A -module tensor products and related constructions	133
Exercises	155
Chapter IV: Functors on categories of Banach spaces	156
§ 1 Functors on Ban	156
§ 2 Bifunctors on Ban	175
§ 3 Tensor products of functors	186
Exercises	200

Chapter V: Duality of functors	202
§ 1 Duality of functors	202
§ 2 The dual functor of Mitjagin-Shvarts	218
§ 3 Integral and nuclear maps	226
Exercises	242
Chapter VI: Kan-extensions	243
§ 1 General remarks on Kan extensions	243
§ 2 Extensions from the categories $\underline{\mathbb{L}}^p$	254
Exercises	268
List of symbols	269
References	272
Index	279
