

CONTENTS

<u>FOREWORD</u>	vii
<u>CHAPTER 1. POLYNOMIALS ON LOCALLY CONVEX TOPOLOGICAL VECTOR SPACES</u>	1
1.1 Algebraic properties of polynomials	1
1.2 Continuous polynomials	9
1.3 Topologies on spaces of polynomials	22
1.4 Duality theory for spaces of polynomials	31
1.5 Exercises	42
1.6 Notes and Remarks	46
<u>CHAPTER 2. HOLOMORPHIC MAPPINGS BETWEEN LOCALLY CONVEX SPACES</u>	53
2.1 Gâteaux holomorphic mappings	53
2.2 Holomorphic mappings between locally convex spaces	57
2.3 Locally convex topologies on spaces of holomorphic mappings	71
2.4 Germs of holomorphic functions	84
2.5 Exercises	92
2.6 Notes and Remarks	99
<u>CHAPTER 3. HOLOMORPHIC FUNCTIONS ON BALANCED SETS</u>	109
3.1 Associated topologies and generalized decompositions in locally convex spaces	110
3.2 Equi-Schauder decompositions of $(H(U;F),\tau)$	119
3.3 Application of generalised decompositions to the study of holomorphic functions on balanced open sets	124

3.4	Semi-reflexivity and nuclearity for spaces of holomorphic functions	141
3.5	Exercises	146
3.6	Notes and Remarks	153
<u>CHAPTER 4.</u>	<u>HOLOMORPHIC FUNCTIONS ON BANACH SPACES</u>	159
4.1	Analytic equalities and inequalities	160
4.2	Bounding subsets of a Banach space	172
4.3	Holomorphic functions on Banach spaces with an unconditional basis	183
4.4	Further results and examples concerning holomorphic functions on Banach spaces	196
4.5	Exercises	204
4.6	Notes and Remarks	210
<u>CHAPTER 5.</u>	<u>HOLOMORPHIC FUNCTIONS ON NUCLEAR SPACES WITH A BASIS</u>	217
5.1	Nuclear spaces with a basis	218
5.2	Holomorphic functions on fully nuclear spaces with a basis	236
5.3	Holomorphic functions on DN spaces with a basis	262
5.4	Topological properties inherited by strict inductive limits and subspaces	277
5.5	Exercises	288
5.6	Notes and Remarks	293
<u>CHAPTER 6.</u>	<u>GERMS, SURJECTIVE LIMITS, \mathcal{E}-PRODUCTS AND POWER SERIES SPACES</u>	297
6.1	Holomorphic germs on compact sets	297
6.2	Surjective limits of locally convex spaces	316
6.3	\mathcal{E} -Products	327
6.4	Power series spaces of infinite type	336
6.5	Exercises	356
6.6	Notes and Remarks	360

<u>APPENDIX I</u>	FURTHER DEVELOPMENTS IN INFINITE DIMENSIONAL HOLOMORPHY	365
<u>APPENDIX II</u>	DEFINITIONS AND RESULTS FROM FUNCTIONAL ANALYSIS, SEVERAL COMPLEX VARIABLES AND TOPOLOGY	397
<u>APPENDIX III</u>	NOTES ON SOME EXERCISES	411
