

Contents

<i>Preface</i>	vii
CHAPTER I. Introduction	1
1. The Dynamic Approach.....	4
2. Scattering Theory Formulated in Terms of Representation Theory.....	6
3. A Semigroup of Operators Related to the Scattering Matrix.....	11
4. The Form of the Scattering Matrix.....	15
5. A Simple Example.....	18
6. Scattering Theory for Transport Phenomena.....	27
7. Notes and Remarks.....	35
CHAPTER II. Representation Theory and the Scattering Operator	37
1. The Discrete Case.....	37
2. The Scattering Operator in the Discrete Case.....	41
3. The Continuous Case.....	46
4. The Scattering Operator in the Continuous Case.....	51
5. Notes and Remarks.....	58
CHAPTER III. A Semigroup of Operators Related to the Scattering Matrix	61
1. The Related Semigroups.....	62
2. On Semigroups of Contraction Operators.....	66
3. Spectral Theory.....	68
4. A Spectral Mapping Theorem.....	77
5. Applications of the Spectral Theory.....	83
6. Equivalent Incoming and Outgoing Representations.....	87
7. Notes and Remarks.....	91
CHAPTER IV. The Translation Representation for the Solution of the Wave Equation in Free Space	93
1. The Hilbert Space H_0 and the Group $\{U_0(t)\}$	94
2. Spectral and Translation Representations of $\{U_0(t)\}$	99
3. The Operator g Extended to Distributions.....	109
4. Translation Representation for Outgoing and Incoming Data with Infinite Energy.....	118
5. Notes and Remarks.....	130

CHAPTER V. The Solution of the Wave Equation in an Exterior Domain	133
1. The Hilbert Space H and the Group $\{U(t)\}$	135
2. Energy Decay and Translation Representations.....	142
3. The Semigroup $\{Z(t)\}$	151
4. The Relation between the Semigroup $\{Z(t)\}$ and the Solutions of the Reduced Wave Equation.....	158
5. The Scattering Matrix.....	165
6. Notes and Remarks.....	175
CHAPTER VI. Symmetric Hyperbolic Systems, the Acoustic Equation with an Indefinite Energy Form, and the Schrödinger Equation	177
<i>Part 1. Symmetric Hyperbolic Systems</i>	178
1. Translation Representation in Free Space.....	178
2. Solutions of Hyperbolic Systems in an Exterior Domain.....	197
<i>Part 2. The Acoustic Equation with an Indefinite Energy Form and the Schrödinger Equation</i>	219
3. Scattering for the Acoustic Equation with an Indefinite Energy Form.....	219
4. The Schrödinger Scattering Matrix.....	240
5. Notes and Remarks.....	244
APPENDIX 1. Semigroups of Operators	245
APPENDIX 2. Energy Decay	255
APPENDIX 3. Energy Decay for Star-Shaped Obstacles BY CATHLEEN S. MORAWETZ.....	261
APPENDIX 4. Scattering Theory for Maxwell's Equations BY GEORG SCHMIDT.....	265
REFERENCES	269
