

CONTENTS

LIST OF SYMBOLS AND NOTATIONS	ix
PRELIMINARIES	1
CHAPTER I. COMPACT MONOTHETIC SEMIGROUPS	8
1. Jointly continuous multiplication	9
2. Semigroups in Banach algebras	12
3. Separately continuous multiplication	16
4. Semigroups of operators in the weak operator topology	17
5. Many-idempotent semigroups	20
Notes on Chapter I	23
CHAPTER II. LOCALLY COMPACT SEMI-ALGEBRAS	25
1. Definitions and examples	26
2. Idempotents	32
3. Simple locally compact semi-algebras	38
Notes on Chapter II	42
CHAPTER III. SEMI-SIMPLE LOCALLY COMPACT MONOTHETIC SEMI-ALGEBRAS	44
1. Definitions and elementary properties	45
2. Semi-simplicity and strictness	47
3. The non-strict case	58
Notes on Chapter III	65
CHAPTER IV. POSITIVE OPERATORS	68
1. Strict semi-algebras	69
2. The Krein-Rutman theorem and some of its generalizations	75
3. Irreducible positive operators	88
Notes on Chapter IV	93
REFERENCES	97
SUBJECT INDEX	101
