

TABLE OF CONTENTS

INTRODUCTION.....	VII
0. CONVERGENCE SPACES.....	1
0.1 Convergence spaces.....	1
0.2 The structure of continuous convergence.....	5
1. FUNCTION ALGEBRAS.....	7
1.1 The completely regular topological space associated to a convergence space.....	7
1.2 Realcompactification and Stone-Čech compactification of a completely regular topological space.....	10
2. VECTOR SPACE TOPOLOGIES ON $C(X)$ FOR WHICH THE EVALUATION MAP IS CONTINUOUS.....	16
2.1 A natural Marinescu structure on $C(X)$	17
2.2 A universal characterization of $C_I(X)$	20
2.3 ω -admissible vector space topologies on $C(X)$	25
3. c -EMBEDDED SPACES.....	30
3.1 Completeness.....	32
3.2 Closed ideals.....	35
3.3 c -embeddedness.....	40
3.4 Compact and locally compact c -embedded spaces.....	46
3.5 Characterization of c -embedded spaces.....	54
3.6 Continuous convergence and compact convergence. $C_I(X)$ for c -embedded X	58
4. UNIVERSAL REPRESENTATIONS OF CONVERGENCE ALGEBRAS AND SOME GENERAL REMARKS ON FUNCTION SPACES.....	64
4.1 Universal representation of a convergence algebra.....	65
4.2 Universal representations of topological algebras.....	69

4.3	<i>Hom A</i> for a subalgebra $A \subset C(X)$	73
4.4	A Stone-Weierstrass type of theorem.....	85
4.5	Universal representations of subalgebras of $C(X)$	91
4.6	Some remarks on function spaces.....	95
5.	FUNCTIONAL ANALYTIC DESCRIPTION OF SOME TYPES OF CONVER- GENCE SPACES.....	106
5.1	Normal topological spaces.....	106
5.2	Separable metric spaces.....	111
5.3	Lindelöf spaces.....	115
5.4	$C_c(X)$ as inductive limit of topological \mathbb{R} -vec- tor spaces.....	120
APPENDIX:	SOME FUNCTIONAL ANALYTIC PROPERTIES OF $C_c(X)$	126
1.	The c -reflexivity of $C_c(X)$	126
2.	On the Pontryagin reflexivity of certain con- vergence \mathbb{R} -vector spaces.....	130
BIBLIOGRAPHY.....		133
INDEX.....		137
LIST OF SOME SYMBOLS.....		139
