Introduction

1. Hilbert Space	3
2. Spinors	4

Finite Number of Dimensions

3. Rotations in n Dimensions	5
4. Null Vectors and Null Planes	7
5. The Independence Theorem	8
6. Specification of a Null Plane without Its Coordinates	9
7. Matrix Notation	12
8. Expression of a Rotation in Terms of an Infinitesimal Rotation	15
9. Complex Rotations	18
10. The Noncommutative Algebra	19
11. Rotation Operators	21
12. Fixation of the Coefficients of Rotation Operators	23
13. The Ambiguity of Sign	26
14. Kets and Bras	28
15. Simple Kets	29

Even Number of Dimensions

16. The Ket Matrix	33
17. The Two-Ket-Matrix Theorem	36
18. The Connection between Two Ket Matrices	39
19. The Representation of Kets	42
20. The Representative of a Simple Ket. General	45
21. The Representative of a Simple Ket. Special Cases ..	48
22. Fixation of the Coefficients of Simple Kets	50
23. The Scalar Product Formula	53

Infinite Number of Dimensions

24. The Need for Bounded Matrices	57
25. The Infinite Ket Matrix	58
26. Passage from One Ket Matrix to Another	62
27. The Various Kinds of Ket Matrices	65
28. Failure of the Associative Law	66
29. The Fundamental Commutators	70
30. Boson Variables	72
31. Boson Emission and Absorption Operators	75
32. Infinite Determinants	79
33. Validity of the Scalar Product Formula	83
34. The Energy of a Boson	88
35. Physical Application	89
