

# CONTENTS

## **Chapter 1. Metric Vector Spaces 1**

1. Basic Definitions 1
2. Isotropic Subspaces and Witt-Index 3
3. Representation in a Basis 5
4. Reflections and the Orthogonal Group 6

## **Chapter 2. Incidence Structures 9**

1. Ternary Equivalence Relations 9
2. Incidence Structures 10
3. Projective Incidence Structures and Substructures 12
4. Projective and Affine Incidence Structures Over a Field 14
5. Incidence Structures Over a Metric Vector Space 15

## **Chapter 3. Metric Concepts 18**

1. Classical Euclidean and Non-Euclidean Planes 18
2. Incidence Structures with Orthogonality 21
3. Metric Incidence Structure Over a Metric Vector Space 22
4. Incidence Structures with Reflections 24
5. Complete Metric Planes 24
6. Metric Plane Over a Metric Vector Space 30
7. Definition of Euclidean and Non-Euclidean Coordinate Planes 33

## **Chapter 4. S-Groups and S-Group Planes 35**

1. Definition 35
2. Group Plane of an S-Group 35
3. Elementary Properties 37
4. Reflections and Motions 38
5. Some Metric Configuration Theorems for S-Group Planes 39
6. The Center of an S-Group 41
7. S-Group Planes and S-Planes 42

**Chapter 5. S-Group Planes with  $\Delta$ -Connected Points 47**

1. The Reduction Theorem 47
2. The Theorem of the Set of Perpendiculars to a Line 49
3. The Mapping  $\sigma_{qAB}$  (Gegenpunktpaarung) 54
4. Dropping a Perpendicular to a Given Line Through a Given Point 58
5. Theorem of Pappus-Brianchon 60
6. Theorem of Desargues 62
7. Embeddable S-Group Planes 66
8. Quadratic Form of S-Group Planes with Completely Connected Points 66

**Chapter 6. Complete S-Group Planes 77**

1. Main Theorems on Complete S-Group Planes 77
2. 2- $\Delta$ -Connected Points in an Arbitrary S-Group Plane 78
3. The Five Types of Complete S-Group Planes 83
4. The Elliptic Planes 89
5. The Euclidean Planes 91
6. The Strubecker Planes 95
7. The Hyperbolic-Metric Planes 104
8. The Minkowskian Planes 115
9. Main Theorem on Complete Metric Planes 130
10. Polar Points in Complete S-Group Planes 132
11. Characteristic of a Complete S-Group Plane 135

**Chapter 7. S-Group Planes with Completely Connected Points 140**

1. Definition of S-Group Planes with Completely Connected Points and the Main Theorem 140
2. Proper Points on a Line 141
3. Germs of Perspective Collineations 144
4. The Ideal Incidence Structure of an S-Group Plane with Completely Connected Points 152
5. Remarks 155
6. Normalizer Planes 157

**Chapter 8. Finite S-Groups 162**

1. Elementary Remarks on Finite S-Groups 162
2. Finite S-Group Planes with Completely Connected Points 165
3. Finite S-Group Planes with 1- $\Delta$ -Connected Points 173
4. Remarks 185

**Appendix: Affine and Projective Planes 187**

1. Affine Planes 187
2. Projective Planes 189
3. Projective Closure of an Affine Plane 192
4. Affine Spaces 193
5. Perspective Collineations of a Projective Plane 194
6. Collineations Induced by Linear Mappings 195
7. Projective Reflections 195
8. Projective Reflection Groups 196
9. Definition of Some Classical Groups 201

**Bibliography 203****Index 207**
