

## TABLE OF CONTENTS

PREFACE

vii

### CHAPTER ONE

#### SOME CLASSES OF LOCALLY CONVEX SPACES

##### § 1. BAIRE SPACES

- |  |    |
|--|----|
| 1. Topological Spaces of Second Category | 1  |
| 2. Products of Baire Spaces              | 5  |
| 3. Locally Convex Baire Spaces           | 11 |

##### § 2. CONVEX - BAIRE SPACES

- |  |    |
|--|----|
| 1. Properties of Countable Families of Convex Sets           | 14 |
| 2. Convex - Baire Spaces                                     | 22 |
| 3. Countable Codimensional Subspaces in a Convex Baire Space | 24 |
| 4. Products of Convex - Baire Spaces                         | 26 |
| 5. Note  | 36 |
| 6. Convex- Baire Sets  | 36 |

##### § 3. QUASIBARRELLED, BARRELLED, BORNOLOGICAL AND ULTRABORNOLOGICAL SPACES

- |   |    |
|---|----|
| 1. Increasing Sequences of Convex Subsets in Locally Convex Spaces    | 38 |
| 2. Countable Codimensional Subspaces of Certain Locally Convex Spaces | 42 |

##### § 4. CLOSED GRAPH THEOREM

- |   |    |
|---|----|
| 1. Mapping with Closed Graph Between Topological Spaces | 48 |
|---|----|

	2. Quasi- Suslin Spaces	52
	3. K - Suslin Spaces	59
	4. Suslin Spaces	68
	5. Semi - Suslin Spaces	78
§	5. ORDERED CONVEX - BAIRE SPACES AND SUPRABARRELLED SPACES	
	1. Ordered Convex - Baire Spaces	94
	2. Suprabarrelled Spaces	98
§	6. OTHER RESULTS ON THE CLOSED GRAPH THEOREM	
	1. General Results on the Closed Graph Theorem	103
	2. Barrelled Spaces and the Closed Graph Theorem	116
§	7. FINITELY ADDITIVE BOUNDED MEASURES	
	1. Properties of Finitely Additive Bounded Measures	124
	2. The Spaces $\ell_0^\infty(X, A)$ and $\ell^\infty(X, A)$	133
§	8. WEAKLY REALCOMPACT LOCALLY CONVEX SPACES	
	1. A Theorem of Corson	136
	2. A Certain Class of Subsets of Positive Integers	140
	3. The space $\ell^\infty / c_0$	141
§	9. INDUCTIVE LIMITS OF SEQUENCES OF LOCALLY CONVEX SPACES	
	1. Generalized Inductive Limits	146
	2. Generalized Strict Inductive Limits	150
	3. Generalized Hyperstrict Inductive Limits	153
	4. Properties of the weak Topologies on Certain (LN)-spaces	155
	5. Some Properties of the (LN) - Spaces	164

## CHAPTER TWO

## SEQUENCE SPACES

§	1. SCALAR SEQUENCE SPACES	
	1. Scalar Sequence Spaces	173

2.	Subsets in a Sequence Space	174
3.	The Normal Topology of a Sequence Space	178
4.	Properties of the $\alpha$ - Dual of a Sequence Space	180
5.	Precompact Sets in Sequence Spaces	189
6.	Quasibarrelled Sequence Spaces	193
7.	Bounded Linear Forms on a Sequence Space	197
8.	Bornological Sequence Spaces	204
9.	Ultrabornological Sequence Spaces	205
10.	Schwartz Sequence Spaces	205
11.	Nuclear Sequence Spaces	207
§ 2.	ECHELON AND CO - ECHELON SPACES	
1.	Echelon and co- Echelon Spaces	210
2.	Reflexive Echelon Spaces	214
3.	Totally Reflexive Echelon Spaces	221
4.	Quasinormable Echelon Spaces	227
§ 3.	ECHELON AND CO - ECHELON SPACES OF ORDER $p$ , $1 < p < \infty$	
1.	General Properties of the Echelon and co - Echelon spaces of order $p$ , $1 < p < \infty$	237
2.	Montel Echelon Spaces of order $p$	244
3.	Totally Montel Echelon Spaces of order $p$	247
4.	Nuclear Echelon Spaces of order $p$	251
§ 4.	ECHELON SPACES OF ORDER ZERO AND ECHELON SPACES OF INFINITE ORDER	
1.	General Properties of Echelon Spaces of order Zero and of Echelon Spaces of finite order	254
2.	Montel Echelon Spaces of order Zero	261
3.	Totally Reflexive Echelon Spaces of order Zero	265
4.	Nuclear Echelon Spaces of order Zero	268
5.	Note	269
§ 5.	EXAMPLES	
1.	Non Complete Normed (LF) - Spaces	269
2.	A Normed Suprabarrelled Space which is not Convex-Baire	277

3.	A Normed Convex - Baire Space which is not Baire	281
4.	A Fréchet Space whose Strong Dual Provided with its Mackey Topology is not Bornological	287
5.	A Fréchet Space whose Strong Dual has a Topology Distinct from its Mackey Topology	292
6.	Non-Complete (LB) - Spaces	302
7.	Closed Subspaces of Strict (LB) - Spaces	303

§ 6. A CLASS OF SPACES OF VECTOR SEQUENCES

1.	The Spaces $J\{E\}$ and $J[E]$	307
2.	Topological Dual and Bidual of $J[E]$	316

CHAPTER THREE

SPACES OF CONTINUOUS FUNCTIONS

§ 1. SPACES OF INFINITELY DIFFERENTIABLE FUNCTIONS AND SPACES OF DISTRIBUTIONS

1.	The Space $s$	325
2.	Some Properties of Complementation in Locally Convex Spaces	331
3.	The Space $\lambda_0(a)$	334
4.	A Representation of the Space $s \hat{\theta} \lambda_0(a)$ when is nuclear	342
5.	A Representation of the Space $s \hat{\theta} \lambda_0(a)$ when it is not Reflexive	345
6.	The Space $\lambda_\infty(a)$	347
7.	The Space $M_n$	348
8.	The Spaces $E(H)$ and $\mathcal{D}(H)$	354
9.	Functions with Compact Support	357
10.	Extension Linear Operator	369
11.	Some Complemented Subspace of $E(H)$	373
12.	Representing the Spaces $E(\Omega)$ and $E'(\Omega)$	380
13.	Representing the Spaces $\mathcal{D}(\Omega)$ and $\mathcal{D}'(\Omega)$	383
14.	Representing the Spaces $\mathcal{D}_+$ , $\mathcal{D}_-$ , $\mathcal{D}'_+$ and $\mathcal{D}'_-$	385
15.	A Representation of the Space $\mathcal{D}(H)$	388
16.	Representing the Spaces $\mathcal{D}_{+\Gamma}$ , $\mathcal{D}_{-\Gamma}$ , $\mathcal{D}'_{+\Gamma}$ and $\mathcal{D}'_{-\Gamma}$	398
17.	A Representation of the Space $S(\mathbb{R}^n)$	403
18.	Representations of the Space $\overset{\circ}{B}(\Omega)$	413

19.	Reflexivity and Nuclearity of $\overset{\circ}{B}(\Omega)$	419
20.	On Certain Sequences in Locally Convex Spaces	421
21.	A Representation of the Space $B_1(\Omega)$	427
22.	Spaces of Functions Defined on a $C^\infty$ -Differentiable Manifold	433
23.	Spaces of Functions Defined on a $C^\infty$ -Differentiable Manifold with Boundary	439
24.	Other Results	442
§ 2.	SPACES OF $C^m$ - DIFFERENTIABLE FUNCTIONS	
1.	A Property of Complementation	443
2.	The Spaces $C^m(H)$ and $\mathcal{D}^m(H)$	445
3.	Linear Extension Operator	447
4.	The Space $c_0(E)$	447
5.	A Representation of the Space $C_0^m(\Omega)$	450
6.	Spaces of Functions Defined on a $C^m$ - Differentiable Manifold	461
7.	Spaces of Functions Defined on a $C^m$ - Differentiable Manifold with Boundary	465
§ 3.	SPACES OF CONTINUOUS FUNCTIONS	
1.	The Theorem of Borsuk	468
2.	Products of Probabilities	471
3.	The Integral Operator of Milutin	479
4.	Some Properties of Complementation	485
5.	The Theorem of Milutin	489
6.	Spaces of Continuous Functions Defined on Certain $K_R$ - Spaces	494
7.	Spaces of Continuous Functions with Compact Support Defined on Certain Locally Compact Spaces	497
