

CONTENTS

1. Introduction	7
1.1. The multiplier criterion	7
1.2. The decomposition method	10
1.3. Classical function spaces	16
2. Non-homogeneous isotropic spaces	24
2.1. Definitions and fundamental properties	24
2.1.1. Definitions	24
2.1.2. Maximal inequalities	29
2.1.3. Fourier multipliers	30
2.1.4. A non-multiplier theorem	33
2.2. Equivalent quasi-norms and representations	38
2.2.1. Regular coverings and related quasi-norms	38
2.2.2. Nikol'skij representations	43
2.2.3. Fourier multipliers and approximation	46
2.2.4. Lizorkin representations	55
2.2.5. Discrete representations for the spaces $B_{p,q}^s$	57
2.2.6. Unconditional analytic Schauder bases in $B_{p,q}^s$	59
2.2.7. Discrete representations for the spaces L_p	62
2.2.8. The Hardy - Lebesgue - Sobolev spaces H_p^s	65
2.2.9. The Besov - Hölder - Zygmund spaces $B_{p,q}^s$ and \mathcal{C}^s	68
2.2.10. Interpolation	71
2.3. Fourier multipliers	74
2.3.1. Definition	74
2.3.2. The classes \mathcal{M}_p and \mathcal{M}_p^H	78
2.3.3. Properties of \mathcal{M}_p	79
2.3.4. A special Fourier multiplier	84
2.3.5. Properties of \mathcal{M}_p^H	86
2.3.6. An algebraic multiplier criterion	90
2.3.7. A multiplier criterion of Hörmander type	93
2.3.8. Convolution algebras	94
2.4. Imbedding theorems	100
2.4.1. Imbedding theorems for different metrics	100
2.4.2. Traces	104

2.5. Dual spaces	115
2.5.1. The case $1 \leq p < \infty$	116
2.5.2. The case $0 < p < 1$	122
2.5.3. The Hardy space H_1 and its dual space	124
2.6. Multiplication properties	127
2.6.1. General multipliers	127
2.6.2. Multiplication algebras	133
2.6.3. The classes $M_{p,\alpha}$	139
2.6.4. Special multipliers	144
2.7. Further properties	
2.7.1. Spaces on R_n^+	154
2.7.2. Diversity of the spaces $B_{p,q}^s$ and $F_{p,q}^s$	156
2.7.3. The differential dimension	158
3. Homogeneous isotropic spaces	159
3.1. Definitions and preliminaries	159
3.1.1. Definitions	159
3.1.2. The spaces $\dot{L}_{p,q}^s$	161
3.1.3. The Hardy spaces \dot{H}_p	162
3.1.4. The space BMO	166
3.2. Representations	167
3.2.1. $\dot{H}_p = \dot{F}_{p,2}^0$	167
3.2.2. BMO = $L_{\infty,2}$	170
4. Problems	171
4.1. General problems	171
4.1.1. The spaces $L_{p,q}^s$ and $H_{p,q}^s$	171
4.1.2. Weighted spaces on R_n	172
4.1.3. Weighted spaces on domains	173
4.1.4. Diffeomorphic maps	174
4.1.5. Spaces of Besov - Hardy - Sobolev type on R_n^+	174
4.1.6. Spaces of Besov - Hardy - Sobolev type on domains	175
4.1.7. Regular elliptic differential operators	176
4.1.8. Strongly degenerate elliptic differential operators	176
4.2. Special problems	177
Report on some new results	179
References	197
List of symbols	206
