

Contents

Author's Preface	7
Chapter 1 Results from Elementary Analysis	
1.1 Functions	9
1.2 Continuity	10
1.3 Discontinuities	11
1.4 Differentiability	12
1.5 Taylor's Theorem	13
1.6 Integration	17
1.7 Improper Integrals	21
1.8 Note on Uniform Convergence	24
1.9 Note on Leibnitz's Rule of Differentiating an Integral	26
Chapter 2 The Delta Function	
2.1 Functions with Simple Discontinuities	29
2.2 Derivative of the Unit Step Function	33
2.3 The Pointwise Behaviour of the Delta Function	36
2.4 The Delta Function as a Stieltjes Integral	38
2.5 Historical Note	42
Chapter 3 Properties of the Delta Function and its Derivatives	
3.1 The Delta Function as a Generalised Function	45
3.2 Addition and Multiplication	47
3.3 Differentiation	50
3.4 Derivatives of the Delta Function	53
3.5 Pointwise Description of $\delta'(t)$	56
3.6 Integration of Delta Functions	58
3.7 Change of Variable	60
Chapter 4 Time-invariant Linear Systems and Generalised Functions	
4.1 Systems and Operators	69
4.2 Step Response and Impulse Response	73
4.3 Convolution as an Operation	76
4.4 Generalised Impulse Response Functions	78
4.5 Transfer Function and Frequency Response	80
4.6 Example: A System Represented by a Differential Equation	84

Chapter 5 The Laplace Transform

5.1 The Classical Laplace Transform	87
5.2 Laplace Transforms of Generalised Functions	92
5.3 Computation of Laplace Transforms	97
5.4 Note on Inversion	104

Chapter 6 Fourier Series and Fourier Transforms

6.1 Fourier Series	109
6.2 Generalised Fourier Series	113
6.3 Fourier Transforms	116
6.4 Generalised Fourier Transforms	123

Chapter 7 Other Types of Generalised Function

7.1 The Finite Part of a Divergent Integral	129
7.2 Pseudo-functions	133
7.3 Test Functions	137
7.4 Linear Functionals and Distributions	142
7.5 The Calculus of Distributions	147
7.6 Distributions in the Sense of Schwartz	151

Chapter 8 Generalised Functions and Integration Theory

8.1 The Riemann-Stieltjes Integral	153
8.2 Extension of the Elementary Stieltjes Integral	156
8.3 Lebesgue and Riemann Integrals	161
8.4 Riemann-Stieltjes and Lebesgue-Stieltjes Integrals	163
