

TABLE OF CONTENTS

1. Åke Pleijel,	A positive symmetric ordinary differential operator combined with one of lower order.	1
2. W.N.Everitt,	Some remarks on a differential expression with an indefinite weight function.	13
3. H.D.Niessen, A.Schneider,	Spectral theory for left-definite singular systems of differential equations I.	29
4. H.D.Niessen, A.Schneider,	Spectral theory for left-definite singular systems of differential equations II. .	45
5. J.B. McLeod,	The limit-point classification of differential expressions.	57
6 M.S.P.Eastham.	Second- and fourth-order differential equations with oscillatory coefficients and not of limit-point type .	69
7. B.D.Sleeman,	Some aspects of multi-parameter spectral theory.	81
8. F.M.Arscott,	Integral-equation formulation of two parameter eigenvalue problems.	95
9. R.Martini.	On differential operators singular at the boundary.	103
10. W.D.Evans,	Degenerate elliptic operators in unbounded domains.	111
11. Kresimir Veselić, Joachim Weidmann,	Scattering theory for a general class of differential operators.	119
12. Ian M.Michael,	The domains of self-adjoint extensions of a Schrödinger operator.	129
13. Magnus Gieritz.	Spaces of generalized functions associated with linear operators.	131
14. E.M.de Jager,	On functions holomorphic in tube-domains $\mathbb{R}^n + i\mathbb{C}$.	137
15. Wiktor Eckhaus,	On the asymptotic theory of non-linear oscillations.	149
16 J.Mauss.	On first order matching process for singular functions.	163
17. J.Grasman.	The birth of a boundary layer in an elliptic singular perturbation problem.	175

18. A. van Harten.	Singular perturbation problems for non-linear elliptic second order equations.	181
19. H.W.Hoogstraten,	An asymptotic theory for a class of weakly non-linear oscillations.	197
Author Index		207

Professors F. Stummel and A.H.M. Levelt delivered lectures, whose proceedings do not appear here.

F.Stummel: Perturbation theory for Sobolev spaces and elliptic boundary value problems.

A.H.M. Levelt: Jordan decomposition for a class of singular differential operators.
