PREFACE vii

INTRODUCTION 1

1. AN INFINITE-HORIZON DISCRETE TIME QUADRATIC PROGRAM AS APPLIED TO A MONOPOLY PROBLEM 7
 1. Introduction 7
 2. Statement of the Problem for the One-Product Case 8
 3. Necessary and Sufficient Conditions for Existence of a Finite Maximum PV 10
 4. Conditions for Existence of a Solution 16
 5. Nonnegativity Conditions 20
 6. Nonnegativity of the Price Sequence 28
 7. Relative Stability of the Optimal and Demand Operators 29
 8. The Multiproduct Case 30
 9. Appendix: Matrix Difference Equations 44
2. CONSTRAINED MAXIMIZATION OF AN INFINITE DIMENSIONAL QUADRATIC FORM WITH AN APPLICATION TO THE THEORY OF THE DEMAND FOR DURABLE GOODS 48
 1. Statement of the Economic Problem 48
 2. Mathematical Preliminaries 58
 3. The Solvability of the Constraints 62
 4. Necessary and Sufficient Conditions for a Maximum 67
 5. Matrix Analysis of the Concavity of a Constrained Quadratic Functional 75
 6. The Principal Theorem 77
 7. A Theory of the Demand for Durables 81
 8. Appendix: Proof of Theorem 4.4 89
3. CONTINUOUS AND DISCRETE TIME APPROACHES TO A MAXIMIZATION PROBLEM 91
 1. Introduction 91
 2. The C Problem 96
 3. The D Problem 103
 4. Interpretation 105
 5. Appendix 110

4. ON THE MINIMUM OF A CONVEX FUNCTIONAL ON A CONVEX SET OF A BANACH SPACE	114
1. Introduction	114
2. Properties of a Convex Functional	117
3. A Sufficient Condition for the Existence of a Minimum	123
4. Supports and Lagrangian Multipliers	132
5. Application to Quadratic Functionals in a Hilbert Space	137
6. Conclusions	142
