Preface	vii
Preface to the English Edition	ix
Notation	xi
<b>1 Preliminaries from functional analysis</b>	<b>1</b>
1.1 Banach spaces	1
1.2 Function spaces	11
1.3 Functions with values in a Banach space	15
<b>2 Dissipative operators and fractional powers of operators</b>	<b>19</b>
2.1 Dissipative operators	19
2.2 Regularly dissipative operators	24
2.3 Fractional powers of operators	32
<b>3 Semigroup of linear operators</b>	<b>51</b>
3.1 Semigroups	51
3.2 Temporally homogeneous equations of evolution	64
3.3 Analytic semigroups	65
3.4 Perturbation of semigroups	71
3.5 Application 1. Initial-value problem of the symmetric hyperbolic system	73
3.6 Application 2. Regularly dissipative operators	75
3.7 Elliptic boundary-value problems	77
3.8 Application 3. Parabolic mixed problems	82
<b>4 Temporally inhomogeneous equations</b>	<b>89</b>
4.1 Fundamental solutions of temporally inhomogeneous equations	89
4.2 Admissible subspace with respect to a generator	90
4.3 Stability of a system of generators	93

---

4.4	Construction of fundamental solutions	94
4.5	Inhomogeneous equations	104
4.6	Application 1. Initial-value problem of the symmetric hyperbolic system	106
4.7	A theorem on fractional powers of positive definite self-adjoint operators	108
4.8	Application 2. Mixed problem of hyperbolic equations	113
<b>5</b>	<b>Parabolic equations</b>	<b>117</b>
5.1	Parabolic equations	117
5.2	The case in which the domain of $A(t)$ is independent of $t$	118
5.3	The case in which the domain of $A(t)$ varies with $t$	129
5.4	The case in which $A(t)$ is a regularly accretive operator	144
5.5	An alternative proof of a theorem due to J. L. Lions	150
5.6	Behaviour of the solutions as $t \rightarrow \infty$	155
5.7	Regularity of solutions	160
	Supplementary notes to Chapter 5	181
<b>6</b>	<b>Non-linear equations</b>	<b>183</b>
6.1	Semilinear wave equations	183
6.2	Monotone operators	194
6.3	Various kinds of continuities and pseudo-monotone operators	199
6.4	Duality mappings	200
6.5	Existence of solutions of monotone operator equations	203
6.6	Semilinear equations	217
<b>7</b>	<b>Optimal control</b>	<b>230</b>
7.1	Formulation of the problem	230
7.2	Distributed observation	231
7.3	Observation of the final state	235
7.4	Time optimal control	237
	Bibliography	247
	Index	258
