Preface xi

Heaviside Operational Calculus as an Abstract Algebraic Structure . xv

Notations xvii

An Historical Foreword xix

Chapter 1 1
Point Function Operands

Chapter 2 4
Interval Functions

Chapter 3 21
Conditions for an Integral Domain of Endomorphisms

Chapter 4 26
Endomorphisms on the Class $\mathscr{F}_T$ of Jump Functions

Chapter 5 30
Rows of Spikes as Operators

Chapter 6 33
The Algebra of Rows of Spikes

Chapter 7 40
The Algebraic Derivative and Operational Forms for the Discrete Heaviside Operational Calculus

Chapter 8 51
Application of the Discrete Heaviside Operational Calculus

Chapter 9 59
From Discrete to Continuous

Chapter 10 65
Interval Functions as Operators on Point Functions

Chapter 11 68
Operational Forms of Point Functions and Interval Functions

Chapter 12 79
Application of the Restricted Heaviside Operational Calculus

Chapter 13 88
Convergence of Point Function Operands

Chapter 14 92
Convergence of Interval Function Operators

Chapter 15 104
Convergence of a Sequence of Rows of Spikes

Chapter 16 109
Approximation of a Continuous Operation by a Digital Operation

Chapter 17 115
Ordered Pairs and the Extension of Divisibility

Chapter 18 122
Impulses, Heaviside's Operator p, Operational Forms, Convergence

Chapter 19 130
Applications

Table I 145
Operational Forms for Rows of Spikes and for Jump Functions

Table 2 148
Operational Forms for Entering Point Functions

References 149
