CONTENTS

FOREWORD vii

PREFACE ix

INDUCED METRICS AND OPERATOR COLLIGATIONS 1
§1. Polymetric Spaces and Inductors 1
§2. Monometric Inductors 4
§3. Operator Colligations 6
§4. Product of Local Colligations 9

DIFFERENTIATION AND INTEGRATION OF COLLIGATIONS 13
§1. Differentiation of Inductors 13
§2. Differentiation of Families of Metric Colligations 18
§3. Integration of Local Colligations 22

THE ASSOCIATED OPEN SYSTEMS 31
§1. The Equations of Open Systems 31
§2. Coupling and Decomposition of Open Systems 37
§3. General Linear Systems and Their Connection with Associated Open Systems 40
§4. Reimannian Geometry and Tensor Colligations 44

THE CHARACTERISTIC OPERATOR FUNCTION 59
§1. The Characteristic Operator Function of a Vector Local Colligation 59
§2. Operator Complexes 61
§3. A Theorem on the Unitary Equivalence of Local Colligations 65
§4. Quasi-Hermitian Colligations 71
§5. Elementary Dissipative Complexes 74

TRIANGULAR AND UNIVERSAL MODELS OF LINEAR OPERATORS 79
§1. Operators of Non-Mermitian Rank One 79
§2. Operators of Arbitrary Non-Mermitian Rank. 91
§3. Complete Dissipative Operators and Complexes 98
§4. Universal Models of Complete Dissipative Complexes . . . 100
§5. A Universal Model with Spectrum at the Origin 103
§6. The Asymptotic Stability of Some Classes of Differential Equations in Hilbert Space 105

STOCHASTIC FIELDS AND STOCHASTIC PROCESSES 107
§1. Basic Concepts 107
§2. Homogeneous Stochastic Fields and Stationary Stochastic Processes 110
§3. Gaussian Stochastic Processes 115
§4. Stochastic Open Systems 116

DISSIPATIVE PROCESSES OF FINITE RANK 121
§1. Dissipative Stochastic Processes 121
§2. Complete Dissipative Processes of Rank One 124
§3. Finite-Dimensional Dissipative Processes of Rank One . 128
§4. Complete Dissipative Processes of Finite Rank 130
§5. Dissipative Processes of Rank One with Spectrum at the Origin 133
§6. Dissipative Processes of Finite Rank with Spectrum at the Origin 135

SPECTRAL RESOLUTIONS OF NONSTATIONARY PROCESSES 137
§1. Complete Processes of Finite Rank 137
§2. Spectral Resolutions of Stochastic Processes of Class C_r . . 144

INVARIANT OPERATOR COLLIGATIONS 153
§1. Auxiliary Concepts 153
§2. Invariance Criteria for Operator Colligations 156
§3. Product of Invariant Operator Colligations 164
§4. Indecomposable Operators 167
§5. Preinvariant Operator Colligations Containing a given Operator A and Bimodule $H_{\tilde{U}, U}$ 172

WEYL FAMILIES OF OPERATOR COLLIGATIONS AND THEIR CORRESPONDING OPEN FIELDS 181
§1. Basic Concepts 181
§2. Decomposition of an Invariant Family of Colligations . . 188
§3. Weyl Families of Operator Colligations 190
§4. The Characteristic Operator Function of a Weyl Family of Colligations 196

BIBLIOGRAPHY 201
