

## TABLE OF CONTENTS

<b>INTRODUCTION . . . . .</b>	<b>1</b>
<b>CHAPTER 1. LINEARIZATIONS . . . . .</b>	<b>8</b>
1.1 Definitions and examples . . . . .	8
1.2 Uniqueness of linearization . . . . .	14
1.3 Existence of linearizations . . . . .	19
1.4 Operator polynomials that are multiples of identity modulo compacts . . . . .	22
1.5 Inverse linearization of operator polynomials . .	27
1.6 Exercises . . . . .	35
1.7 Notes . . . . .	37
<b>CHAPTER 2. REPRESENTATIONS AND DIVISORS OF MONIC OPERATOR POLYNOMIALS . . . . .</b>	<b>39</b>
2.1 Spectral pairs . . . . .	39
2.2 Representations in terms of spectral pairs . . .	44
2.3 Linearizations . . . . .	47
2.4 Generalizations of canonical forms . . . . .	50
2.5 Spectral triples . . . . .	52
2.6 Multiplication and division theorems . . . . .	56
2.7 Characterization of divisors in terms of subspaces . . . . .	61
2.8 Factorable indexless polynomials . . . . .	66
2.9 Description of the left quotients . . . . .	75
2.10 Spectral divisors . . . . .	82
2.11 Differential and difference equations . . . . .	83
2.12 Exercises . . . . .	88
2.13 Notes . . . . .	91
<b>CHAPTER 3. VANDERMONDE OPERATORS AND COMMON MULTIPLES . .</b>	<b>93</b>
3.1 Definition and basic properties of the Vandermonde operator . . . . .	93

3.2 Existence of common multiples . . . . .	98
3.3 Common multiples of minimal degree . . . . .	104
3.4 Fredholm Vandermonde operators . . . . .	107
3.5 Vandermonde operators of divisors . . . . .	109
3.6 Divisors with disjoint spectra . . . . .	114
Appendix: Hulls of operators . . . . .	116
3.7 Application to differential equations . . . . .	120
3.8 Interpolation problem . . . . .	122
3.9 Exercises . . . . .	124
3.10 Notes . . . . .	128

CHAPTER 4. STABLE FACTORIZATIONS OF MONIC  
OPERATOR POLYNOMIALS . . . . . 130

4.1 The metric space of subspaces in a Banach space . . . . .	130
4.2 Spherical gap and direct sums . . . . .	137
4.3 Stable invariant subspaces . . . . .	143
4.4 Proof of Theorems 4.3.3 and 4.3.4 . . . . .	147
4.5 Lipschitz stable invariant subspaces and one-sided resolvents . . . . .	153
4.6 Lipschitz continuous dependence of supporting subspaces and factorizations . . . . .	160
4.7 Stability of factorizations of monic operator polynomials . . . . .	166
4.8 Stable sets of invariant subspaces . . . . .	172
4.9 Exercises . . . . .	175
4.10 Notes . . . . .	176

CHAPTER 5. SELF-ADJOINT OPERATOR POLYNOMIALS . . . . . 178

5.1 Indefinite scalar products and subspaces . . . . .	179
5.2 J-self-adjoint and J-positizable operators . . . . .	183

5.3 Factorizations and invariant semidefinite subspaces . . . . .	185
5.4 Classes of polynomials with special factorizations . . . . .	195
5.5 Positive semidefinite operator polynomials . . . . .	197
5.6 Strongly hyperbolic operator polynomials . . . . .	199
5.7 Proof of Theorem 5.6.4 . . . . .	202
5.8 Invariant subspaces for unitary and self-adjoint operators in indefinite scalar products . . . . .	208
5.9 Self-adjoint operator polynomials of second degree . . . . .	216
5.10 Exercises . . . . .	220
5.11 Notes . . . . .	222
<b>CHAPTER 6. SPECTRAL TRIPLES AND DIVISIBILITY OF NON-MONIC OPERATOR POLYNOMIALS . . . . .</b>	<b>224</b>
6.1 Spectral triples: definition and uniqueness . . . . .	224
6.2 Calculus of spectral triples . . . . .	231
6.3 Construction of spectral triples . . . . .	241
6.4 Spectral triples and linearization . . . . .	251
6.5 Spectral triples and divisibility . . . . .	254
6.6 Characterization of spectral pairs . . . . .	260
6.7 Reduction to monic polynomials . . . . .	263
6.8 Exercises . . . . .	268
6.9 Notes . . . . .	268
<b>CHAPTER 7. POLYNOMIALS WITH GIVEN SPECTRAL PAIRS AND EXACTLY CONTROLLABLE SYSTEMS . . . . .</b>	<b>269</b>
7.1 Exactly controllable systems . . . . .	269
7.2 Spectrum assignment theorems . . . . .	273
7.3 Analytic dependence of the feedback . . . . .	284
7.4 Polynomials with given spectral pairs . . . . .	287

7.5 Invariant subspaces and divisors . . . . .	292
7.6 Exercises . . . . .	294
7.7 Notes . . . . .	296
<b>CHAPTER 8. COMMON DIVISORS AND COMMON MULTIPLES . . . . .</b>	<b>297</b>
8.1 Common divisors . . . . .	297
8.2 Common multiples . . . . .	300
8.3 Coprimeness and Bezout equation . . . . .	306
8.4 Analytic behavior of common multiples . . . . .	311
8.5 Notes . . . . .	316
<b>CHAPTER 9. RESULTANT AND BEZOUTIAN OPERATORS . . . . .</b>	<b>317</b>
9.1 Resultant operators and their kernel . . . . .	317
9.2 Proof of Theorem 9.1.4 . . . . .	322
9.3 Bezoutian operator . . . . .	329
9.4 The kernel of a Bezoutian operator . . . . .	333
9.5 Inertia theorems . . . . .	338
9.6 Spectrum separation . . . . .	344
9.7 Spectrum separation problem: deductions and special cases . . . . .	355
9.8 Applications to difference equations . . . . .	358
9.9 Notes . . . . .	359
<b>CHAPTER 10. WIENER-HOPF FACTORIZATION . . . . .</b>	<b>361</b>
10.1 Definition and the main result . . . . .	361
10.2 Pairs of finite type and proof of Theorem 10.1.1 . . . . .	364
10.3 Finite-dimensional perturbations . . . . .	366
10.4 Notes . . . . .	370
<b>REFERENCES . . . . .</b>	<b>371</b>
<b>Notation . . . . .</b>	<b>385</b>
<b>Index . . . . .</b>	<b>387</b>
