

Table of Contents

Preface	ix
----------------------	----

Introduction

I. General remarks	1
II. Some notations	2
III. Gamma and beta functions	3
IV. Numbering	5
V. References	5
VI. Polynomials: notations and formulas	5
VII. Exercises and examples	8

Chapter 1 Introductory Noncommutative Algebra

I. Representations	9
II. Heisenberg-Weyl algebra	12
III. $\mathfrak{sl}(2)$ algebra	18
IV. Splitting formulas	24
V. Exercises and examples	28

Chapter 2 Hypergeometric functions

I. Notations	35
II. Generating function for ${}_2F_1$	35
III. General formulation of CVPS and transformation formulas	36
IV. Formulas related to HW algebra	37
V. Formulas related to $\mathfrak{sl}(2)$ algebra	38
VI. Exercises and examples	39

Chapter 3 Probability and Fock Spaces

I. Trace functionals: probability and operators	41
II. Fock spaces	48
III. Tensor products	62
IV. Exercises and examples	72

Chapter 4 Moment Systems

I. Moment generating functions and convolution	77
II. Moment systems	83
III. Radial moment systems	92
IV. Holomorphic canonical variables	104
V. Exercises and examples	113

Chapter 5 Bernoulli Processes

I. Bernoulli systems: general structure	126
II. Binomial process and Krawtchouk polynomials	136
III. Negative binomial process and Meixner polynomials	140
IV. Continuous binomial process and Meixner-Pollaczek polynomials	142
V. Poisson process and Poisson-Charlier polynomials	145
VI. Exponential process and Laguerre polynomials	151
VII. Brownian motion and Hermite polynomials	155
VIII. Canonical moments	160
IX. Exercises and examples	162

Chapter 6 Bernoulli Systems

I. Expansions, Rodrigues, and Riccati	166
II. ω -kernel	172
III. X operator	173
IV. Generating functions	177
V. Riccati equations and Bernoulli systems	180
VI. Reproducing kernels	186
VII. Exercises	193

Chapter 7 Matrix Elements

I. Matrix elements	195
II. Addition formulas and Riccati equations	199
III. Coherent states and coherent state representations	201
IV. Addition formulas for matrix elements of the group	207
V. Exercises	211
