CONTENTS

Zur Tagung XI
List of participants XIII
Wissenschaftliches Programm XVII

I Operator Theory

H.F. TROTTER: Approximation and perturbation of semigroups . . . 3
U. WESTPHAL: Gebrochene Potenzen abgeschlossener Operatoren, definiert mit Hilfe gebrochener Potenzen 23
B. SZ.-NAGY, C. FOIAŞ: Injection of shifts into strict contractions . . 29
J.T. MARTI: Approximation mit Polynomoperatoren 39

II Function Algebras

W. MLAK: Operator-valued representations of function algebras . . . 49
I. SUCIU: Functional models for positive maps on $C(X)$ 81
G.K. BRAGARD, R.J. NESSEL: On the comparison of approximation processes in Banach algebras 97
J. BOMAN: On comparison theorems for generalized moduli of continuity 105
H. GÜNZLER: Stonean lattices, measures and completeness 113

III Rearrangement Invariant Spaces and Interpolation

C. BENNETT: Banach function spaces and interpolation methods II. Interpolation of weak-type operators 129
J.E. GILBERT: Counter-examples in interpolation space theory from harmonic analysis 141
Y. SAGHER: Norm inequalities on Fourier coefficients and interpolation theory 169
D. GAŞPAR, H. JOHNEN: Über eine Klasse von Rearrangement-invarianten Banach-Räumen 181
F. FEHÉR: Approximationssätze auf Rearrangement-invarianten Banach-Räumen über dem Torus 189
R. SHARPLEY: Characterization of intermediate spaces of M_φ spaces . 205

IV Harmonic Analysis

P.R. MASANI, M. ROSENBERG: The multiplication operator in $\mathcal{L}_2$ over a localizable space and Bochner's theorem 217
R.A. HUNT: Comments on Lusin's conjecture and Carleson's proof for $\mathcal{L}_2$ Fourier series 235

F. HOLLAND: Square-summable positive-definite functions on the real line 247
L. LEINDLER: On unimprovable results concerning strong approximation of Fourier series 259

V Orthogonal Expansions and Weighted Approximation

B. MUCKENHOUPT: Weighted norm inequalities for classical operators . 265
G. FREUD: On the theory of one-sided weighted $\mathcal{L}_1$-approximation by polynomials 285
R. ASKEY: Positive Jacobi polynomial sums, III 305
K. TANDORI: Über die Konvergenz von Funktionenreihen 313

VI Best Approximation

J.-P. KAHANE: Les opérateurs de Tœplitz et la meilleure approximation . 323
W. DAHMEN, E. GÖRLICH: Asymptotically optimal linear approximation processes and a conjecture of Golomb 327
R. DEVORE: Degree of monotone approximation 337
D. LEVIATAN: The Müntz-Jackson approximation theorem 353
A. SCHÖNHAGE: Optimal quadrature formulae for periodic functions . 363

VII Korovkin-Type Theorems and Saturation

H. BERENS, G.G. LORENTZ: Korovkin theorems for sequences of contractions on $\mathcal{L}_p$-spaces 367
D. KERSHAW: Regular and convergent Korovkin sequences 377
S. STADLER: Über 1-positive lineare Operatoren 391
J. SZABADOS: Convergence and saturation problems of discrete linear operators 405
G. SUNOUCHI: Local saturation of trigonometric operators 421

VIII Differential Equations and Other Applications

J.L.B. COOPER: Fourier transform methods for solution of differential equations 443
G. DAPRATO: Sums of linear operators 461
R.P. GILBERT, R.J. WEINACHT: Reproducing kernels for elliptic systems in divergence form 473
G.G. LORENTZ: The Birkhoff interpolation problem: New methods and results 481
J.W. JEROME, L.L. SCHUMAKER: On the distance to a class of generalized splines 503
A. OSTROWSKI: Partielle Differentiation singulärer Integrale 519
B.S. MITJAGIN: Divergenz von Spektralentwicklungen in $\mathcal{L}_p$-Räumen . 521

IX Sequences and Summability Theory

G. M. PETERSEN: Topology of subsets of the bounded sequences . . . 533
K. ISHIGURO, W. MEYER-KÖNIG: Über das Verträglichkeitsproblem bei den Kreisverfahren der Limitierungstheorie 547
W. BEEKMANN, K. ZELLER: Positive Operatoren in der Limitierung . . 559
S. D. CHATTERJI: On a theorem of Banach and Saks 565

New and Unsolved Problems 579
Alphabetical List of Papers 587
