<i>FOREWORD</i>	7
<b>1</b>	
<b>Basic facts about ordered sets</b>	9
1.1. General facts about ordered sets	9
1.2. Lattices	12
1.3. Convergence with respect to the order relation	23
Bibliographical comments	30
<b>2</b>	
<b>Elementary facts from the theory of topological vector spaces</b>	31
2.1. Topological vector spaces	31
2.2. Locally convex spaces	38
2.3. Uniform convergence topologies in spaces of linear continuous operators	46
2.4. Duality between vector spaces	51
Bibliographical comments	60
<b>3</b>	
<b>Ordered vector spaces</b>	61
3.1. Ordered vector spaces. Directed spaces and Archimedean spaces	61
3.2. Vector lattices	69
3.3. Decompositions of a vector lattice	90
3.4. Concrete spaces	111
Bibliographical comments	117
<b>4</b>	
<b>Vector lattices with special properties</b>	119
4.1. Vector lattices with unit element	119
4.2. Regular spaces, spaces of countable type, maximal spaces	128

4.3. Lattice ordered algebras . . . . .	135
4.4. Special spaces . . . . .	147
Bibliographical comments . . . . .	152

**5**

<b>Regular operators and <math>(o)</math>-continuous operators</b> . . . . .	155
5.1. Regular linear operators . . . . .	155
5.2. $(o)$ -Continuous linear operators . . . . .	167
5.3. Disjunctive operators and multiplicative operators . . . . .	186
5.4. Regular bilinear operators and $(o)$ -continuous bilinear operators . . . . .	194
Bibliographical comments . . . . .	205

**6**

<b>Topological ordered vector spaces</b> . . . . .	207
6.1. Topological ordered vector spaces . . . . .	207
6.2. Topological vector lattices . . . . .	216
6.3. Linear operators defined on topological vector lattices . . . . .	243
6.4. Special spaces . . . . .	252
Bibliographical comments . . . . .	262

**7**

<b>Vector integrals and the representation of some linear operators</b> . . . . .	265
7.1. Spaces with vector norm, bounded linear operators and vector integrals . . . . .	265
7.2. Integrals with respect to vector measures . . . . .	278
Bibliographical comments . . . . .	288

**8**

<b>Some applications of the theory of ordered vector spaces</b> . . . . .	289
8.1. Operator equations . . . . .	289
8.2. Various applications . . . . .	297
Bibliographical comments . . . . .	313

<b>References</b> . . . . .	315
<b>Subject index</b> . . . . .	337
