

TABLE OF CONTENTS

Introduction	1
1. Divisibility of transfer functions	5
1.1 Multiplication and divisibility of nodes	5
1.2 Canonical spectral factorization (1)	11
1.3 Finite dimensional nodes	17
1.4 Characteristic operator functions and transfer functions	19
1.4.1 Brodskii nodes	20
1.4.2 Krein nodes	21
1.4.3 Monic nodes	24
1.4.4 Polynomial nodes	29
1.4.5 Final remarks	31
1.5 Möbius transformations of nodes	34
2. Realization and linearization	44
2.1 Realization for rational matrix functions	44
2.2 Realization for rational operator functions	52
2.3 Realization for arbitrary holomorphic operator functions	53
2.4 Linearization	56
3. Minimal nodes	62
3.1 Minimality of nodes	62
3.2 Minimality for finite dimensional nodes	65
3.3 Minimality in special cases	71
3.3.1 Brodskii nodes	71
3.3.2 Krein nodes	72
3.3.3 Monic nodes	73
3.3.4 Polynomial nodes	73
4. Minimal factorizations of rational matrix functions	77
4.1 Local degree and local minimality	77
4.2 McMillan degree and minimality of nodes	82

4.3	Minimal factorization	84
4.4	Canonical spectral factorization (2)	91
4.5	Application to Wiener-Hopf integral equations	93
4.6	Application to block Toeplitz matrices	100
4.7	Application to singular integral equations	105
5.	Divisibility and Riccati equation	110
5.1	Angular subspaces and angular operators	110
5.2	Angular operators and the division theorem	113
5.3	The Riccati equation	118
6.	Application to transport equation	121
6.1	The transport equation	121
6.2	Wiener-Hopf equations with operator-valued L_1 -kernels	123
6.3	Construction of the Wiener-Hopf factorization	125
6.4	The matching of the subspaces	136
6.5	Formulas for solutions	139
7.	Stability of spectral divisors	142
7.1	Examples and first results for finite dimensional case	142
7.2	Opening between subspaces and angular operators	146
7.3	Stability of spectral divisors of nodes	153
7.4	Applications to transfer functions	161
7.5	Applications to Riccati equation	165
8.	Stability of divisors	169
8.1	Stable invariant subspaces	169
8.2	Stable minimal factorizations of rational matrix functions	178
8.3	Stable factorization of monic matrix polynomials	182

8.4	Stable solutions of the operator Riccati equation	186
8.5	Stability of stable factorizations	187
9.	Factorization of real matrix functions	191
9.1	Real rational matrix functions	191
9.2	Real monic matrix polynomials	195
9.3	Stable and isolated invariant subspaces	196
9.4	Stable and isolated real factorizations	207
9.5	Stability of stable real factorizations	212
