

# Table of Contents

<b>1. Preliminaries</b>	<b>1</b>
1.1 Vector and Matrix Norms . . . . .	1
1.2 Classes of Matrices . . . . .	2
1.3 Eigenvalues of Matrices . . . . .	3
1.4 Matrix-Valued Functions . . . . .	4
1.5 Contour Integrals . . . . .	5
1.6 Algebraic Equations . . . . .	6
1.7 The Triangular Representation of Matrices . . . . .	7
1.8 Notes . . . . .	8
References . . . . .	8
<b>2. Norms of Matrix-Valued Functions</b>	<b>11</b>
2.1 Estimates for the Euclidean Norm of the Resolvent . . . . .	11
2.2 Examples . . . . .	13
2.3 Relations for Eigenvalues . . . . .	14
2.4 An Auxiliary Inequality . . . . .	17
2.5 Euclidean Norms of Powers of Nilpotent Matrices . . . . .	18
2.6 Proof of Theorem 2.1.1 . . . . .	20
2.7 Estimates for the Norm of Analytic Matrix-Valued Functions . . . . .	21
2.8 Proof of Theorem 2.7.1 . . . . .	22
2.9 The First Multiplicative Representation of the Resolvent . . . . .	24
2.10 The Second Multiplicative Representation of the Resolvent . . . . .	27
2.11 The First Relation between Determinants and Resolvents . . . . .	28
2.12 The Second Relation between Determinants and Resolvents . . . . .	30
2.13 Proof of Theorem 2.12.1 . . . . .	30
2.14 An Additional Estimate for Resolvents . . . . .	32
2.15 Notes . . . . .	33
References . . . . .	33
<b>3. Invertibility of Finite Matrices</b>	<b>35</b>
3.1 Preliminary Results . . . . .	35
3.2 $l^p$ -Norms of Powers of Nilpotent Matrices . . . . .	37

3.3	Invertibility in the Norm $\ \cdot\ _p$ ( $1 < p < \infty$ ) . . . . .	39
3.4	Invertibility in the Norm $\ \cdot\ _\infty$ . . . . .	40
3.5	Proof of Theorem 3.4.1 . . . . .	41
3.6	Positive Invertibility of Matrices . . . . .	44
3.7	Positive Matrix-Valued Functions . . . . .	45
3.8	Notes . . . . .	47
	References . . . . .	47
<b>4.</b>	<b>Localization of Eigenvalues of Finite Matrices</b>	<b>49</b>
4.1	Definitions and Preliminaries . . . . .	49
4.2	Perturbations of Multiplicities and Matching Distance . . . . .	50
4.3	Perturbations of Eigenvectors and Eigenprojectors . . . . .	52
4.4	Perturbations of Matrices in the Euclidean Norm . . . . .	53
4.5	Upper Bounds for Eigenvalues in Terms of the Euclidean Norm . . . . .	56
4.6	Lower Bounds for the Spectral Radius . . . . .	57
4.7	Additional Bounds for Eigenvalues . . . . .	59
4.8	Proof of Theorem 4.7.1 . . . . .	60
4.9	Notes . . . . .	62
	References . . . . .	62
<b>5.</b>	<b>Block Matrices and <math>\pi</math>-Triangular Matrices</b>	<b>65</b>
5.1	Invertibility of Block Matrices . . . . .	65
5.2	$\pi$ -Triangular Matrices . . . . .	67
5.3	Multiplicative Representation of Resolvents of $\pi$ -Triangular Operators . . . . .	69
5.4	Invertibility with Respect to a Chain of Projectors . . . . .	70
5.5	Proof of Theorem 5.1.1 . . . . .	72
5.6	Notes . . . . .	74
	References . . . . .	74
<b>6.</b>	<b>Norm Estimates for Functions of Compact Operators in a Hilbert Space</b>	<b>75</b>
6.1	Bounded Operators in a Hilbert Space . . . . .	75
6.2	Compact Operators in a Hilbert Space . . . . .	77
6.3	Triangular Representations of Compact Operators . . . . .	79
6.4	Resolvents of Hilbert-Schmidt Operators . . . . .	83
6.5	Equalities for Eigenvalues of a Hilbert-Schmidt Operator . . . . .	84
6.6	Operators Having Hilbert-Schmidt Powers . . . . .	86
6.7	Resolvents of Neumann-Schatten Operators . . . . .	88
6.8	Proofs of Theorems 6.7.1 and 6.7.3 . . . . .	88
6.9	Regular Functions of Hilbert-Schmidt Operators . . . . .	91
6.10	A Relation between Determinants and Resolvents . . . . .	93
6.11	Notes . . . . .	95
	References . . . . .	95

<b>7. Functions of Non-compact Operators</b>	<b>97</b>
7.1 Terminology	97
7.2 $P$ -Triangular Operators	98
7.3 Some Properties of Volterra Operators	99
7.4 Powers of Volterra Operators	100
7.5 Resolvents of $P$ -Triangular Operators	101
7.6 Triangular Representations of Quasi-Hermitian Operators	104
7.7 Resolvents of Operators with Hilbert-Schmidt Hermitian Components	106
7.8 Operators with the Property $A^p - (A^*)^p \in C_2$	107
7.9 Resolvents of Operators with Neumann - Schatten Hermitian Components	108
7.10 Regular Functions of Bounded Quasi-Hermitian Operators	109
7.11 Proof of Theorem 7.10.1	110
7.12 Regular Functions of Unbounded Operators	113
7.13 Triangular Representations of Regular Functions	115
7.14 Triangular Representations of Quasiunitary Operators	116
7.15 Resolvents and Analytic Functions of Quasiunitary Operators	117
7.16 Notes	120
References	120
 <b>8. Bounded Perturbations of Nonselfadjoint Operators</b>	 <b>123</b>
8.1 Invertibility of Boundedly Perturbed $P$ -Triangular Operators	123
8.2 Resolvents of Boundedly Perturbed $P$ -Triangular Operators	126
8.3 Roots of Scalar Equations	127
8.4 Spectral Variations	129
8.5 Perturbations of Compact Operators	130
8.6 Perturbations of Operators with Compact Hermitian Components	132
8.7 Notes	134
References	134
 <b>9. Spectrum Localization of Nonself-adjoint Operators</b>	 <b>135</b>
9.1 Invertibility Conditions	135
9.2 Proofs of Theorems 9.1.1 and 9.1.3	137
9.3 Resolvents of Quasinormal Operators	139
9.4 Upper Bounds for Spectra	142
9.5 Inner Bounds for Spectra	143
9.6 Bounds for Spectra of Hilbert-Schmidt Operators	145
9.7 Von Neumann-Schatten Operators	146
9.8 Operators with Hilbert-Schmidt Hermitian Components	147
9.9 Operators with Neumann-Schatten Hermitian Components	148

9.10 Notes . . . . .	149
References . . . . .	149
<b>10. Multiplicative Representations of Resolvents</b>	<b>151</b>
10.1 Operators with Finite Chains of Invariant Projectors . . . . .	151
10.2 Complete Compact Operators . . . . .	154
10.3 The Second Representation for Resolvents of Complete Compact Operators . . . . .	156
10.4 Operators with Compact Inverse Ones . . . . .	157
10.5 Multiplicative Integrals . . . . .	158
10.6 Resolvents of Volterra Operators . . . . .	159
10.7 Resolvents of $P$ -Triangular Operators . . . . .	159
10.8 Notes . . . . .	161
References . . . . .	161
<b>11. Relatively <math>P</math>-Triangular Operators</b>	<b>163</b>
11.1 Definitions and Preliminaries . . . . .	163
11.2 Resolvents of Relatively $P$ -Triangular Operators . . . . .	165
11.3 Invertibility of Perturbed RPTO . . . . .	166
11.4 Resolvents of Perturbed RPTO . . . . .	167
11.5 Relative Spectral Variations . . . . .	167
11.6 Operators with von Neumann-Schatten Relatively Nilpotent Parts . . . . .	168
11.7 Notes . . . . .	172
References . . . . .	172
<b>12. Relatively Compact Perturbations of Normal Operators</b>	<b>173</b>
12.1 Invertibility Conditions . . . . .	173
12.2 Estimates for Resolvents . . . . .	175
12.3 Bounds for the Spectrum . . . . .	176
12.4 Operators with Relatively von Neumann - Schatten Off-diagonal Parts . . . . .	177
12.5 Notes . . . . .	180
References . . . . .	180
<b>13. Infinite Matrices in Hilbert Spaces and Differential Operators</b>	<b>181</b>
13.1 Matrices with Compact off Diagonals . . . . .	181
13.2 Matrices with Relatively Compact Off-diagonals . . . . .	184
13.3 A Nonselfadjoint Differential Operator . . . . .	185
13.4 Integro-differential Operators . . . . .	186
13.5 Notes . . . . .	187
References . . . . .	188

<b>14. Integral Operators in Space <math>L^2</math></b>	<b>189</b>
14.1 Scalar Integral Operators . . . . .	189
14.2 Matrix Integral Operators with Relatively Small Kernels . . .	191
14.3 Perturbations of Matrix Convolutions . . . . .	193
14.4 Notes . . . . .	196
References . . . . .	197
<b>15. Operator Matrices</b>	<b>199</b>
15.1 Invertibility Conditions . . . . .	199
15.2 Bounds for the Spectrum . . . . .	202
15.3 Operator Matrices with Normal Entries . . . . .	204
15.4 Operator Matrices with Bounded off Diagonal Entries . . . .	205
15.5 Operator Matrices with Hilbert-Schmidt Diagonal Operators	207
15.6 Example . . . . .	209
15.7 Notes . . . . .	212
References . . . . .	212
<b>16. Hille - Tamarkin Integral Operators</b>	<b>215</b>
16.1 Invertibility Conditions . . . . .	215
16.2 Preliminaries . . . . .	217
16.3 Powers of Volterra Operators . . . . .	219
16.4 Spectral Radius of a Hille - Tamarkin Operator . . . . .	221
16.5 Nonnegative Invertibility . . . . .	222
16.6 Applications . . . . .	223
16.7 Notes . . . . .	226
References . . . . .	226
<b>17. Integral Operators in Space <math>L^\infty</math></b>	<b>227</b>
17.1 Invertibility Conditions . . . . .	227
17.2 Proof of Theorem 17.1.1 . . . . .	228
17.3 The Spectral Radius . . . . .	230
17.4 Nonnegative Invertibility . . . . .	231
17.5 Applications . . . . .	232
17.6 Notes . . . . .	234
References . . . . .	234
<b>18. Hille - Tamarkin Matrices</b>	<b>235</b>
18.1 Invertibility Conditions . . . . .	235
18.2 Proof of Theorem 18.1.1 . . . . .	237
18.3 Localization of the Spectrum . . . . .	238
18.4 Notes . . . . .	240
References . . . . .	241

<b>19. Zeros of Entire Functions</b>	<b>243</b>
19.1 Perturbations of Zeros . . . . .	243
19.2 Proof of Theorem 19.1.2 . . . . .	246
19.3 Bounds for Sums of Zeros . . . . .	248
19.4 Applications of Theorem 19.3.1 . . . . .	250
19.5 Notes . . . . .	252
References . . . . .	252
<b>List of Main Symbols</b>	<b>253</b>
