

CONTENTS

1. Generalities on ψ .d.o's.
2. The L^2 -continuity of ψ .d.o's of type (ρ, δ) .
3. The calculus of ψ .d.o's of type (ρ, δ) .
4. ψ .d.o's on manifolds.
5. Inverting elliptic operators; the wave front set.
6. Taking square roots: Gårding's inequality.
7. On mollifiers.
8. Introduction to the problem of local solvability for operators of principal type.
9. Hypoelliptic second-order equations.
10. Propagation of singularities for operators of principal type and real principal symbol.

Bibliography.
