

Contents

<u>CHAPTER 1</u>	<u>THE CAUCHY PROBLEM AND ASSOCIATED SEMI-GROUPS</u>	
1.	The euclidean case	1
2.	The Banach-space case	4
3.	Strong continuity of the associated semi-group	9
4.	Regularity properties	12
<u>CHAPTER 2</u>	<u>UNIFORMLY CORRECT CAUCHY PROBLEM AND SEMI-GROUPS</u>	
	<u>OF CLASS C_0</u>	
1.	The uniformly well-posed Cauchy problem	15
2.	Fundamental properties of semi-groups of class C_0	16
3.	The Laplace transform of the semi-groups of class C_0	19
4.	The uniformly well-posed Cauchy problem - sequel	20
5.	Integration of the nonhomogeneous equation	24
6.	Well-posed Cauchy problem on the real line	29
7.	The fundamental existence theorem	38
8.	Some "abstract" applications	46
<u>CHAPTER 3</u>	<u>UNIQUENESS OF THE CAUCHY PROBLEM</u>	
1.	The first uniqueness result	51
2.	Uniqueness via convexity	55
<u>CHAPTER 4</u>	<u>WEAK SOLUTIONS OF THE NONHOMOGENEOUS EQUATION</u>	
1.	Definitions, elementary properties	59
2.	A local existence result	62

<u>CHAPTER 5</u>	<u>ASYMPTOTIC BEHAVIOUR</u>	
1.	Uniqueness of bounded solutions	67
2.	Solutions which have a limit at infinity	76
<u>CHAPTER 6</u>	<u>REGULARITY OF SOLUTIONS</u>	
1.	On k - and ∞ - differentiability	84
2.	Analytic solutions	88
<u>CHAPTER 7</u>	<u>ASYMPTOTIC BEHAVIOUR (SEQUEL)</u>	
1.	Bounded solutions of the second-order equation	95
2.	Behaviour at ∞	98
<u>CHAPTER 8</u>	<u>WEAK SOLUTIONS ON THE REAL LINE</u>	
1.	Preliminaries	103
2.	Approximation properties	105
<u>CHAPTER 9</u>	<u>ELEMENTARY SOLUTIONS</u>	
1.	Definition of elementary solutions	114
2.	Existence of elementary solutions	116
<u>CHAPTER 10</u>	<u>ALMOST-PERIODIC SOLUTIONS</u>	
1.	Existence and uniqueness of an almost-periodic solution	122
