

TABLE OF CONTENTS

1.	Introduction	1
Chapter I. The Ovseyannikov theorem		
2.	Statement of the Ovseyannikov theorem	11
3.	Proof of the Ovseyannikov theorem	14
4.	Dependence of the solution on the data	18
5.	Regularity of the solution	22
6.	A functorial remark	24
7.	The resolvent	27
8.	Regularity of the resolvent	34
9.	Fundamental kernel and hypoellipticity	44
10.	Existence and uniqueness of distribution solutions	50
11.	Application: the Cauchy-Kovalevska theorem and its transpose	53
12.	Application: Derivation of Holmgren's theorem	59
13.	Further regularity results in the constant coefficients case. Application: Cauchy problem for entire functions of finite order.....	63
14.	Spaces K^G	70
15.	Evolution equations related to convolution in the spaces K^G	78
16.	Local Cauchy problems with variable coefficients in spaces K^G	82
Chapter II. Hyperdifferential operators		
17.	Analytic functionals	91
18.	The Fourier-Borel transformation	99
19.	The Cauchy representation	105
20.	The link between the Fourier-Borel transformation and the Cauchy representation	113

21.	Hyperdifferential operators. Definition	117
22.	Symbols of a hyperdifferential operator. Expression of a hyperdifferential operator by means of its symbols	126
23.	An injectivity result and other consequences of Theorem 22.1	135
24.	Compose of two hyperdifferential operators. Symbol of a compose	145
25.	Analytic functionals defined by distributions	153
26.	Hyperdifferential operators preserving distributions	160
27.	Hyperdifferential operators preserving distributions. Sufficient conditions bearing on the Fourier-Borel symbol	171

**Chapter III. Resolvents of linear PDE with analytic
coefficients as hyperdifferential operators**

28.	The resolvents of systems of linear PDEs with analytic coefficients are hyperdifferential operators	181
29.	The constant coefficients case. Gårding's theorem	189
30.	Almost diagonalizable systems in one space variable.....	198

Appendix A.	Reduction of higher order systems to first order ones	209
--------------------	--	-----

Appendix B.	Proof of the fundamental theorem about convex carriers of analytic functionals	215
--------------------	--	-----
