

TABLE OF CONTENTS

PREFACE		v
CHAPTER 1. PARSEVAL FORMULAS		
1. Introduction		1
2. Quantum scattering theory		2
3. Sturm-Liouville problems		11
4. The generalized spectral function and Parseval formulas		21
5. Model singular problems I		32
6. Model singular problems II		43
7. Generalized translation for singular problems		50
8. Generalized translation and singular transmutation		61
9. Model singular transmutations		73
10. Canonical derivation of Parseval formulas		86
11. Canonical derivation of Parseval formulas II		97
12. Canonical derivation of Parseval formulas III		106
CHAPTER 2. SPECIAL FUNCTIONS		
1. Introduction		119
2. Model spherical transforms		119
3. Model spherical transforms II		127
4. General spherical transforms I		139
5. General spherical transforms II		149
6. Scattering theory revisited		157
7. Generalized Gelfand-Levitan equations		168
8. Triangularity and connection formulas		179
9. Further remarks on the Gelfand-Levitan and Marčenko equations		193
10. Further remarks on transforms		206
11. Singular pseudodifferential operators		224
12. Elliptic transmutation		240

CHAPTER 3. INVERSE PROBLEMS	
1. Introduction	263
2. The one dimensional problem in geophysics I	264
3. The one dimensional problem in geophysics II	275
4. The one dimensional problem in geophysics III	285
5. Some three dimensional problems in geophysics I	297
6. Three dimensional problems in geophysics II	313
7. Three dimensional problems in geophysics III	329
8. Other approaches to the one dimensional geophysical problem	342
9. One dimensional techniques	356
10. Singular analogies	366
11. Singular analogies II	377
12. Singular analogies III	388
13. Singular inverse problems	402
