

Contents

<i>Introduction</i>	xiii
<i>Acknowledgments</i>	xv
Chapter 1 Computers, Sound, and Digital Audio	1
Operating Systems	2
Unsound Sound: Sound Unwound	3
Decomposing Sound in Frequency and Time	9
Sound and Human Perception	14
Mixing Sound	18
Analog Warmth, Digital Precision	19
Taking a Byte Out of Bits	31
Sound into Numbers: Analog-to-Digital Conversion	35
Numbers into Sound: Digital-to-Analog Conversion	45
The Digital Audio Workstation	45
A New Studio Paradigm	46
DAW Components	47
Purchasing a DAW	48
Disadvantages of the DAW	48
Advantages of the DAW	49
For Further Study	49
Exercises and Classroom Discussion	50
Chapter 2 The Development of the Modern DAW	53
Bell Labs	55
The RCA Synthesizer	58
The University of Illinois	61
The Legacy of Synthesizers	64

Winham Lab	66
Minicomputer-Based DAWs	67
Home Microcomputers and the “Proto-DAW”	68
The Samson Box and Stanford University	72
The IRCAM Signal Processing Workstation	74
Other Workstation-Based Systems	75
Next-Generation Commercial Systems of the 1980s	76
The Legacy of Software-Based Mixing	77
The “Music-N” Family	77
CARL	79
MIX/Cmix and Rt	79
Conclusion	81
For Further Study	81
Exercises and Classroom Discussion	83
Chapter 3 Sound Files: Formats, Storage, and Transport	85
Conceptual Overview	87
Sound File Headers	88
Sampling Rate	88
Number of Channels	88
Bit Depth	89
Fixed Point versus Floating Point	90
Signed, Unsigned	94
Bit Order	94
Companding	95
Data Compression	95
File Size	98
File Conversion	98
Uncompressed (Usually) Formats	99
Headerless Audio Files	99
Audio Interchange File Format	99
Wave	100
Miscellaneous Uncompressed Formats	100
Compressed Formats	101
Lossy Compressed Formats	102
Lossless Compressed Formats	106
Miscellaneous Audio File Formats	108

Sampler File Formats	108
Looping Formats	108
Multitrack Formats	109
Summary of Major Digital Audio File Formats	110
Overview of File Storage	110
Hard Disk Storage	111
Optical Storage	111
Flash Storage	112
Digital Magnetic Tape Storage	113
Cross-Studio Transport and Integration	114
CD/DVD	114
Internet	114
Portable Drives	115
Removable Media	115
More Permanent Solutions	115
For Further Study	116
Exercises and Classroom Discussion	116
Chapter 4 Editing and Mixing	119
Introduction to Digital Audio Signal Processing	120
Basics of Digital Filters	120
Two Families of Filters	123
DAW Software	127
Conceptual Overview and Terminology	128
Visualizing Sound	138
Two-Track Editors	143
Multitrack Editor-Sequencers	148
Mixing: Where Are We Going?	168
Traditional Mixing Techniques	170
Starting with Quality Ingredients	172
The Rough Mix	172
Comparative Mixing	173
Multiple-Monitor Mixing	173
Low-Level Monitoring	174
Making Multiple Mixes	175
Controlling Noise	175
Tuning Problems	176
Critical Bands	176

Fletcher-Munson Curves	178
Effects Processing	179
Vocal Intelligibility	180
Dealing with Drums	180
Phase Problems	181
Panning Issues	182
Effective Equalization	183
Space	184
Learning by Doing	184
For Further Study	186
Exercises and Classroom Discussion	186

Chapter 5 Plug-Ins 189

Families of Plug-Ins	190
Sound Analyzers	191
Time-Domain Analysis	192
Frequency-Domain Analysis	194
Spatial Imaging Analysis	195
Tempo Trackers	201
Pitch Trackers	203
Experimental	203
Effects Processors	204
Dither	204
Delay and Echo	208
Reverberation	209
Chorusing and Flanging	216
Equalization	217
Waveshaping and Distortion	221
Dynamics	221
Triggers	223
“Classical” Computer Music Effects	224
Spatial Processing	224
Psychoacoustic Processors	226
Frequency Shifting and Time Scaling	227
Pitch Correction	229
Noise Reduction and Audio Restoration	230
Amplifier and Microphone Modeling	230
Multieffects Processing (Chaining Effects Together)	232

Miscellaneous and Experimental Effects	233
Virtual Instruments	233
Synthesizers	234
Drum Machines	234
Samplers	234
Musical Audio Effects Processing	235
Effect/Affect	235
Blending	236
Emulation/Illusion	237
Summary	238
Plug-In Formats	238
VST	239
TDM	240
AudioSuite	240
Real-Time Audio Suite (RTAS)	241
HTDM	241
MAS	241
DirectX	241
LADSPA	242
Audio Units	242
Premiere	242
Plug-In Wrappers	243
Creating DAW Plug-Ins	243
The Easy Way	244
Plug-In APIs	244
User Interface Issues	244
Case Study: Getting Started Creating a VST Plug-In	245
Summary	247
For Further Study	248
Exercises and Classroom Discussion	248
Chapter 6 A Closer Look at the DAW Studio	251
DAW Hardware	252
Computers	252
Audio Interfaces	253
Loudspeakers and Headphones	259
Input Devices and Control Surfaces	259
Hardware Mixing Consoles	260

Setting Up a DAW-Based Studio	260
The DAW-Based Stereo Project Studio	262
For Further Study	264
Exercises and Classroom Discussion	265
Chapter 7 Surround Mixing and Monitoring	267
Surrounded by Sound	269
Timing Cues	270
Level Cues	271
Tonal Cues	272
Surround Audio on the DAW	277
Aesthetic Considerations	277
The Surround DAW Studio	281
Introduction to Surround Configurations and Formats	282
Spatial-Processing Techniques	296
Panning and Equal-Power Laws	296
ITD	299
Reverberation	299
Filtering	300
Ambisonics	300
HRTF Processing	300
Wave-Field Synthesis	300
Distribution and Presentation of Surround Audio	301
Distribution of Surround Audio	302
Presentation of Surround Audio	302
For Further Study	304
Exercises and Classroom Discussion	305
Chapter 8 Recording and the DAW	307
Transducers	308
Introduction to Microphones	309
Terminology	309
Directional Sensitivity Categories	314
Types of Microphones	315
Dynamic	315
Condenser	318

Ribbon	320
Other Microphone Types	320
Primary Microphone Placement Techniques	322
Characteristics of the Source	323
Acoustical Considerations	324
Ready to Record?	324
Microphone Placement	325
Spaced-Apart Pair Techniques	326
Coincident-Pair Stereo Techniques	329
Multiple Microphone and Surround Recording Techniques	332
Recording to a DAW	334
Recording Latency Considerations	335
Preamps	336
Recording in the Project Studio	336
The Laptop Studio Revisited	337
For Further Study	337
Exercises and Classroom Discussion	338
Chapter 9 Expanding the Palette	339
Synchronization	340
Word Clock	341
Timecode	343
MIDI	345
An Overview of the MIDI Specification	346
Tracks and Channels	347
MIDI Messages	348
Extensions to MIDI	354
MIDI Controllers	359
Beyond MIDI	360
Software Synthesis Environments	361
Graphical Synthesis Environments	363
Text-Based Synthesis Environments	365
Computer-Assisted Composition and Mixing	365
Digital Video	368
What's Next?	369
For Further Study	370
Exercises and Classroom Discussion	371

Chapter 10	Mastering and Distribution	373
	Audio Mastering on the DAW	374
	Physical Music Distribution	378
	CD	378
	DVD	378
	SACD	380
	Duplication and Replication	381
	Networked Music Distribution	382
	Copy Protection	383
	Marketing	384
	So Now What?	385
	For Further Study	385
	Exercises and Classroom Discussion	386
	<i>Index</i>	387
