## Preface

v

<b>1</b>	<b>Banach Algebras and Spectral Theory</b>	<b>1</b>
1.1	Banach Algebras: Basic Concepts . . . . .	1
1.2	Gelfand Theory . . . . .	5
1.3	Nonunital Banach Algebras . . . . .	12
1.4	The Spectral Theorem . . . . .	16
1.5	Spectral Theory of $*$ -Representations . . . . .	26
1.6	Notes and References . . . . .	28
<b>2</b>	<b>Locally Compact Groups</b>	<b>31</b>
2.1	Topological Groups . . . . .	31
2.2	Haar Measure . . . . .	36
2.3	Interlude: Some Technicalities . . . . .	43
2.4	The Modular Function . . . . .	46
2.5	Convolutions . . . . .	49
2.6	Homogeneous Spaces . . . . .	54
2.7	Notes and References . . . . .	64
<b>3</b>	<b>Basic Representation Theory</b>	<b>67</b>
3.1	Unitary Representations . . . . .	67
3.2	Representations of a group and its group algebra . . . . .	73
3.3	Functions of Positive Type . . . . .	76
3.4	Notes and References . . . . .	86
<b>4</b>	<b>Analysis on Locally Compact Abelian Groups</b>	<b>87</b>
4.1	The Dual Group . . . . .	87
4.2	The Fourier Transform . . . . .	93
4.3	The Pontryagin Duality Theorem . . . . .	100
4.4	Representations of Locally Compact Abelian Groups . . . . .	105
4.5	Closed Ideals in $L^1(G)$ . . . . .	107
4.6	Spectral Synthesis . . . . .	116
4.7	The Bohr Compactification . . . . .	119
4.8	Notes and References . . . . .	121

<b>5 Analysis on Compact Groups</b>	<b>125</b>
5.1 Representations of Compact Groups . . . . .	125
5.2 The Peter-Weyl Theorem . . . . .	128
5.3 Fourier Analysis on Compact Groups . . . . .	133
5.4 Examples . . . . .	139
5.5 Notes and References . . . . .	147
<b>6 Induced Representations</b>	<b>151</b>
6.1 The Inducing Construction . . . . .	152
6.2 The Frobenius Reciprocity Theorem . . . . .	160
6.3 Pseudomeasures and Induction in Stages . . . . .	162
6.4 Systems of Imprimitivity . . . . .	167
6.5 The Imprimitivity Theorem . . . . .	174
6.6 Introduction to the Mackey Machine . . . . .	182
6.7 Examples . . . . .	188
6.8 Notes and References . . . . .	197
<b>7 Further Topics in Representation Theory</b>	<b>201</b>
7.1 The Group $C^*$ Algebra . . . . .	201
7.2 The Structure of the Dual Space . . . . .	204
7.3 Tensor Products . . . . .	210
7.4 Direct Integral Decompositions . . . . .	219
7.5 The Plancherel Theorem . . . . .	232
7.6 Examples . . . . .	239
<b>Appendices</b>	<b>253</b>
1 A Hilbert Space Miscellany . . . . .	253
2 Trace-Class and Hilbert-Schmidt Operators . . . . .	256
3 Vector-Valued Integrals . . . . .	259
<b>Bibliography</b>	<b>263</b>
<b>Index</b>	<b>271</b>

## *List of Figures*

7.1 The dual space of $H_n$ . . . . .	240
7.2 The dual space of the $ax + b$ group. . . . .	242
7.3 The dual space of $SL(2, \mathbf{R})$ . . . . .	247
