## BACKGROUND

<b>1</b>	<b>Dialect and language</b>	<b>3</b>
1.1	Mutual intelligibility	3
1.2	Language, dialect and accent	5
1.3	Geographical dialect continua	6
1.4	Social dialect continua	8
1.5	Autonomy and heteronomy	10
1.6	Discreteness and continuity	14
	Further information	14
<b>2</b>	<b>Dialect geography</b>	<b>15</b>
2.1	The impetus for dialect geography	15
2.2	An outline history of dialect geography	18
2.3	The methods of dialect geography	24
2.3.1	The questionnaire	24
2.3.2	Linguistic maps	28
2.3.3	The selection of informants	33
	Further information	35
<b>3</b>	<b>Dialectology and linguistics</b>	<b>37</b>
3.1	Dialectology and philology	37

3.2	Structural dialectology	38
3.2.1	Inventory, distribution and incidence	41
3.2.2	Lexical correspondences	42
3.3	Generative dialectology	45
3.4	Polylectal grammars	50
	Further information	53
4	<b>Urban dialectology</b>	54
4.1	Social dialects	54
4.2	Urban dialects	55
4.3	Representativeness	56
4.4	Obtaining data	58
4.5	Classifying informants	59
4.6	The linguistic variable	59
	Further information	64
<b>SOCIAL VARIATION</b>		
5	<b>Social differentiation and language</b>	67
5.1	Language and social class	67
5.2	Stylistic differentiation	70
5.3	Sex differentiation	71
5.4	Other aspects of social differentiation in language	74
5.4.1	Language and ethnic group	74
5.4.2	Social networks <i>id.</i>	75
5.4.3	Individual characteristics	79
	Further information	80
6	<b>Sociolinguistic structure and linguistic innovation</b>	82
6.1	Indicators and markers	82
6.1.1	Overt stigmatisation	84
6.1.2	Linguistic change	84
6.1.3	Phonological contrast	85
6.1.4	Stereotypes	87
6.2	The study of linguistic change	88
6.2.1	Patterns of age differentiation	91
6.3	Mechanisms of linguistic change	94
6.3.1	Stylistic variation	95
6.3.2	The role of sex	97
6.3.3	Covert prestige	98
	Further information	100

## SPATIAL VARIATION

7	<b>Boundaries</b>	103
7.1	Isoglosses	103
7.2	Patterns of isoglosses	105
7.3	Bundles	109
7.4	Grading of isoglosses	112
7.4.1	Structural categories of isoglosses	112
7.4.2	Distribution of lexical isoglosses	116
7.5	Cultural correlates of isoglosses	120
	Further information	123
8	<b>Transitions</b>	125
8.1	Gradual and abrupt transition	125
8.2	Introduction to the variables	127
8.3	The transition zone for (u)	129
8.4	Mixed and fudged lects	132
8.5	The variable (a)	137
8.6	Transitions in general	142
	Further information	142

## MECHANISMS OF VARIATION

9	<b>Variability</b>	145
9.1	The variable as a structural unit	145
9.2	Implicational scales	149
9.3	Variable rules	155
9.4	Objections to implicational scales and variable rules	159
	Further information	161
10	<b>Diffusion: sociolinguistic and lexical</b>	163
10.1	Real time and apparent time	163
10.2	Innovators of change	167
0.2.1	A class-based innovation in Norwich	167
0.2.2	A sex-based innovation in Belfast	170
0.2.3	An age-based innovation in New York City	171
10.3	Lexical diffusion	174
	Further information	180
11	<b>Diffusion: geographical</b>	182
11.1	Spatial diffusion of language	182
11.2	Spatial linguistics	183

## *Contents*

11.3	Linguistic areas	184
11.4	Uvular /r/ in Europe	187
11.5	Diffusion down the urban hierarchy	189
11.6	Cartographical representation of spatial diffusion	192
11.6.1	The Norwegian study	194
11.7	Explanations in sociolinguistic dialect geography	196
11.8	Further refinements to the model	202
	Further information	204
12	<b>Towards geolinguistics</b>	205
	Further information	207
	Bibliography	209
	Index	215

## LIST OF MAPS

	<i>page</i>
1-1 - European dialect continua	7
1-2 Sweden and Denmark	13
2-1 Display map for 'newt'	30
2-2 Interpretive map for 'newt'	31
6-1 /j/-dropping in eastern England	87
7-1 Single line isoglosses	104
7-2 Double line heteroglosses	104
7-3 Features separating Low German and High German	106
7-4 Isoglosses around the German villages of Bubsheim, Denkingen and Böttingen	108
7-5 Rhotic dialects in England	110
7-6 Bundles of isoglosses in France	111
7-7 Distribution of lexical items meaning 'drain pipe' along the Scots-English border	116
7-8 Distribution of lexical items meaning 'oatmeal' along the Scots-English border	118
7-9 Distribution of lexical items meaning 'lead pencil' along the Scots-English border	119
7-10 Isoglosses and place-names in Massachusetts	121
8-1 England, showing the southern limit of [ʊ] in <i>some</i> and [a] in <i>chaff</i>	128
8-2 East Anglia and the east midlands, showing occurrences of (u)	130
8-3 The distribution of mixed lects in the transition zone	133
8-4 Distribution of fudged lects	134
8-5 The elements of a transition zone	136
8-6 Variable (a) in East Anglia and the east midlands	138
8-7 The transition zone for (a) in East Anglia and the east midlands	140
11-1 Front rounded vowels in Europe	185

11-2	Uvular <i>r</i> in Europe	186
11-3	Uvular <i>r</i> in southern Sweden	187
11-4	Uvular <i>r</i> in Norway, older speakers	188
11-5	Uvular <i>r</i> in Norway, younger speakers	190
11-6	Uvular <i>r</i> in greater social detail	191
11-7	/æ/-raising in northern Illinois	192
11-8	Brunlanes, Norway	193
11-9	(sj) in Brunlanes, speakers aged 70 +	195
11-10	(sj) in Brunlanes, speakers aged 25-69	196
11-11	(sj) in Brunlanes, speakers aged 24 -	197
11-12	East Anglian centres	199

## LIST OF FIGURES

	<i>page</i>
1-1 The initial linguistic situation in Jamaica	8
1-2 The situation after contact between English and Creole speakers	9
1-3 West Germanic dialect continuum	11
1-4 Scandinavian dialect continuum	12
5-1 The (æ) variable in Ballymacarrett, The Hammer and Clonard, Belfast	78
6-1 Norwich (ng) by class and style	83
6-2 Norwich (a:) by class and style	83
6-3 Norwich (o) by class and style	85
6-4 Norwich (ng) by age and style	91
6-5 Norwich (e) by age and style	93
6-6 Norwich (ir) by age and style	94
6-7 New York City (r) by class and style	96
10-1 Representation of a typical variable	168
10-2 Class differences for the variable (e) in Norwich	169
10-3 Sex and age differences for two variables in Ballymacarrett, Belfast	171
10-4 Variable (Ay) in New York City with respect to social class	173
10-5 Variable (Ay) in New York City with respect to age	174
10-6 Progress of lexical diffusion on the assumption that diffusion proceeds at a uniform rate	178
10-7 Progress of lexical diffusion in the S-curve model	179
10-8 Speakers in the transition zone for variable (u)	180
11-1 /æ/-raising in northern Illinois by size of town	193

## LIST OF TABLES

6-1	Endings of selected infinitives in Tønsberg Norwegian	<i>page</i> 89
6-2	Age group differentiation in Eskilstuna	91
6-3	Age differentiation in Washington, DC	93
6-4	Stress assignment in Trondheim Norwegian	100
8-1	Summary of lectal types for (u)	135
8-2	The lectal continuum for (a) in East Anglia and the east midlands	141
9-1	The possible lects in a speech community in which (X) implies (Y)	150
9-2	Grammaticality judgements for sentences (1)–(4) shown as a scalogram	151
9-3	A scalogram of the variable constraints on (CC) in northern England	153
9-4	The combined frequencies of the variable constraints in rule (6)	156
10-1	Pre-adult groups in New York City	163
10-2	Occurrences of nucleus [ɜɪ] in words like <i>bird</i> and <i>verse</i> in New York City in the 1940s	172
10-3	Lexical variants among speakers in the transition zone for the variable (u)	177
11-1	Influence index scores of London and East Anglian centres	198
11-2	Influence index scores of northern Illinois centres	201
