Index	707

Maps and charts

Map 1:	Outcomes of long <i>*ñ</i> in the Low Countries	434
Map 2:	Old High German sound shift	438
Map 3:	RUKI and palatal assibilation in Indo-European dialects	444
Map 4:	Old High German isoglosses	445
Map 5:	Old High German isoglosses (more complete coverage)	446
Map 6:	Old High German dialects: prehistoric tree diagram	448
Map 7:	Old High German dialects: synchronic tree diagram	449
Map 8:	(Proto-)Indo-European dialects: tree diagram	450
Map 9:	(Proto-)Indo-European dialects: modified tree diagram	452
Map 10:	(Proto-)Indo-European dialects: isoglosses	455, 569
Map 11:	Ancient Greek dialects	468
Map 12:	South Asian language families	499
Map 13:	Some European isoglosses	508
Map 14:	Word order isoglosses in Europe and neighboring areas	509
Map 15:	Word order isoglosses in Africa	511
Chart 1.1:	Language change	2, 3
Chart 1.2:	Language relationship (Old English, Old High German, Gothic)	8, 9
Chart 1.3:	Language relationship (Major European languages)	10
Chart 2.1:	Places of articulation and articulators	12
Chart 2.2:	Sonority hierarchy	22
Chart 2.3:	Phonetic symbols and segment classes	23
Chart 5.1:	The weakening hierarchy	83
Chart 5.2:	Allophonic tones in Hindi	99
Chart 9.1:	Systematic onomatopoeia in English	177
Chart 13.1:	Sentence tree diagram	314
Chart 15.1:	Outcomes of PGmc. <i>*þ, t, k</i> in the older continental Germanic dialects, grouped in terms of phonetic environments	439
Chart 15.2:	'Indo-Baltic' and Latin correspondences for PIE <i>*k̑</i> and <i>*s</i>	443
Chart 15.3:	Additional Old High German isoglosses	447
Chart 16.1:	Pidgin sample text	514
Chart 19.1:	Germanic non-sibilant obstruent correspondences	596
Chart 20.1:	Sound change as envisioned by neogrammarians	635
