| <i>List of Figures</i>   | xiii |
| <i>A Note on Transcription and Transliteration</i>                       | xvii |
| 1. Introduction  | 1    |
| 1.1. Why Reconstruction?   | 1    |
| 1.2. The Methods of Reconstruction                                       | 4    |
| 1.3. The Status and Limitations of Reconstructions                       | 7    |
| 2. Background to the Comparative Method                                  | 17   |
| 2.1. The Significance of the Comparative Method                          | 17   |
| 2.2. The Origins of the Comparative Method                               | 17   |
| 2.3. The Development of the Comparative Method in the Nineteenth Century | 19   |
| 2.4. The Nineteenth Century: Conclusions                                 | 32   |
| 3. The Comparative Method in the Twentieth Century                       | 37   |
| 3.1. Introduction  | 37   |
| 3.2. Structuralist Linguistics and Language Change                       | 37   |
| 3.3. The Comparative Method and Generative Grammar                       | 44   |
| 3.4. The Twentieth Century: Further Developments                         | 50   |
| 4. The Comparative Method: Basic Procedures                              | 57   |
| 4.1. Introduction  | 57   |
| 4.2. Stages of Reconstruction  | 58   |
| 4.3. Setting up the Correspondences                                      | 60   |
| 4.4. Establishing the Proto-Phonemes                                     | 69   |
| 4.5. Assigning Phonetic Values   | 81   |
| 4.6. Conclusion  | 87   |
| 5. Comparative Reconstruction of Morphology, Syntax, and the Lexicon     | 92   |
| 5.1. Introduction  | 92   |
| 5.2. Comparative Reconstruction of Morphology                            | 92   |

|  |     |
|--|-----|
| 5.3. Comparative Reconstruction of Syntax                                      | 104 |
| 5.4. Reconstruction and the Lexicon  | 109 |
| 6. Issues in Comparative Reconstruction  | 122 |
| 6.1. Introduction  | 122 |
| 6.2. The Tree Model  | 122 |
| 6.3. The Wave Model  | 128 |
| 6.4. The Uniformity of the Proto-Language                                      | 133 |
| 6.5. The Regularity Principle  | 136 |
| 6.6. The Comparative Method: Evaluation  | 137 |
| 7. Internal Reconstruction   | 145 |
| 7.1. Introduction: The Origin of the Method                                    | 145 |
| 7.2. The Basis of the Method   | 146 |
| 7.3. Formalizing the Method: Stages of Reconstruction                          | 153 |
| 7.4. Setting up the Correspondences  | 154 |
| 7.5. Establishing the Pre-Phonemes   | 155 |
| 7.6. Assigning Phonetic Values   | 165 |
| 7.7. Reconstructing Systems and Structures                                     | 169 |
| 8. Applications and Implications of Internal Reconstruction                    | 185 |
| 8.1. Internal Reconstruction of Morphology                                     | 185 |
| 8.2. Internal Reconstruction of Syntax   | 190 |
| 8.3. 'Laws' of Language Development  | 194 |
| 8.4. Internal Reconstruction, Generative Phonology, and<br>Relative Chronology | 206 |
| 8.5. Internal Reconstruction and the Comparative Method                        | 210 |
| 9. Reconstructing Language Relationships                                       | 217 |
| 9.1. Introduction  | 217 |
| 9.2. Criteria for Subgrouping  | 218 |
| 9.3. Trees and Language Relationships  | 224 |
| 9.4. Mass Comparison   | 236 |
| 10. Language Typology and Linguistic Reconstruction                            | 247 |
| 10.1. The Typological Classification of Languages                              | 247 |
| 10.2. Language Typology, Language Change, and<br>Reconstruction                | 250 |
| 10.3. Typology and Phonological Reconstruction                                 | 253 |
| 10.4. Typology and Syntactic Reconstruction                                    | 261 |
| 11. Quantitative Methods in Reconstruction                                     | 275 |
| 11.1. Introduction: The Use of Quantitative Methods                            | 275 |
| 11.2. The Probabilities of Language Relationships                              | 276 |

|   |     |     |
|---|-----|-----|
| 11.3. Lexicostatistics and Glottochronology | 279 |     |
| 11.4. Quantitative Methods and Typology     | 291 |     |
| 12. Reconstruction, Culture, and Society    |     | 303 |
| 12.1. Introduction                          | 303 |     |
| 12.2. Evidence for the Cultural Context     | 305 |     |
| 12.3. Prehistoric Homelands                 | 308 |     |
| 12.4. Reconstructing Culture                | 322 |     |
| <i>References</i>                           |     | 330 |
| <i>General Index</i>                        |     | 359 |
| <i>Language Index</i>                       |     | 365 |
| <i>Name Index</i>                           |     | 368 |

# List of Figures

---

|            |   |    |
|------------|---|----|
| FIG. 2.1.  | Grimm's Law                               | 21 |
| FIG. 2.2.  | Grimm's Law as a cyclical process         | 22 |
| FIG. 2.3.  | Schleicher's <i>Stammbaum</i>             | 26 |
| FIG. 2.4.  | The Law of Palatals                       | 29 |
| FIG. 2.5.  | Verner's Law                              | 31 |
| FIG. 3.1.  | Germanic <i>i</i> -umlaut                 | 40 |
| FIG. 3.2.  | Latin rhotacism                           | 41 |
| FIG. 3.3.  | Rule ordering in German dialects          | 48 |
| FIG. 3.4.  | Rule ordering in Standard German          | 48 |
| FIG. 4.1.  | Family relationships                      | 61 |
| FIG. 4.2.  | 'Squirrel' in Muskogean                   | 68 |
| FIG. 4.3.  | Correspondence sets                       | 70 |
| FIG. 4.4.  | The default case: no change               | 70 |
| FIG. 4.5.  | Merger in one language                    | 71 |
| FIG. 4.6.  | Different mergers in different languages  | 72 |
| FIG. 4.7.  | Merger in the Gypsy languages             | 73 |
| FIG. 4.8.  | The same merger in different languages    | 73 |
| FIG. 4.9.  | Final consonants in Chinese               | 74 |
| FIG. 4.10. | Initial nasals in Mandarin Chinese        | 75 |
| FIG. 4.11. | Primary split                             | 76 |
| FIG. 4.12. | Secondary split                           | 77 |
| FIG. 4.13. | /s/ and /r/ in Latin and Oscan            | 78 |
| FIG. 4.14. | <i>I</i> -umlaut in Old Norse             | 78 |
| FIG. 4.15. | Stops in Papago and Hopi                  | 79 |
| FIG. 4.16. | Romance vowel correspondences             | 85 |
| FIG. 4.17. | Proto-Romance vowel systems               | 86 |
| FIG. 4.18. | Proto-Romance vowel system: final version | 86 |
| FIG. 4.19. | Inverted reconstruction                   | 87 |
| FIG. 5.1.  | Causatives in Sanskrit and Gothic         | 93 |

|            |   |     |
|------------|---|-----|
| FIG. 5.2.  | Cases in Sanskrit, Greek, and Latin                           | 97  |
| FIG. 5.3.  | Reconstructing cases  | 98  |
| FIG. 5.4.  | The functions of cases in the Indo-European languages         | 99  |
| FIG. 5.5.  | Correspondence sets for Indo-European cases                   | 100 |
| FIG. 5.6.  | Tocharian cases   | 101 |
| FIG. 5.7.  | Germanic <i>i</i> -umlaut                                     | 102 |
| FIG. 5.8.  | The position of the verb in the older Indo-European languages | 107 |
| FIG. 5.9.  | Lexical reconstruction of *pont-                              | 115 |
| FIG. 5.10. | Lexical reconstruction of <i>starve</i>                       | 116 |
| FIG. 5.11. | Berlin and Kay's colour scheme                                | 117 |
| FIG. 6.1.  | The sources of Modern English                                 | 124 |
| FIG. 6.2.  | Schmidt's wave theory   | 128 |
| FIG. 6.3.  | Splits and the wave theory                                    | 129 |
| FIG. 6.4.  | Waves and language groupings                                  | 130 |
| FIG. 6.5.  | Some shared features in the Indo-European languages           | 132 |
| FIG. 6.6.  | Waves in a non-homogeneous language area                      | 133 |
| FIG. 6.7.  | Possible groupings for waves in a non-homogeneous area        | 134 |
| FIG. 7.1.  | Alternations and Latin rhotacism                              | 149 |
| FIG. 7.2.  | Correspondence sets and Verner's Law                          | 152 |
| FIG. 7.3.  | Combining the Comparative Method and Internal Reconstruction  | 153 |
| FIG. 7.4.  | Alternating morphs in English                                 | 155 |
| FIG. 7.5.  | Alternating morphs in Old High German                         | 157 |
| FIG. 7.6.  | Primary split   | 159 |
| FIG. 7.7.  | Distribution pattern following primary split                  | 159 |
| FIG. 7.8.  | Distribution pattern for Latin rhotacism                      | 160 |
| FIG. 7.9.  | Distribution pattern for German final devoicing               | 160 |
| FIG. 7.10. | Phoneme loss in Classical Greek                               | 160 |
| FIG. 7.11. | Distribution pattern for Greek *t/*s                          | 161 |
| FIG. 7.12. | The Germanic vowel system                                     | 164 |
| FIG. 7.13. | Patterns of change in German and Gothic                       | 168 |
| FIG. 7.14. | Ablaut in the Germanic languages                              | 170 |
| FIG. 7.15. | Vowel patterns for Germanic ablaut (i)                        | 171 |
| FIG. 7.16. | Vowel patterns for Germanic ablaut (ii)                       | 171 |

|   |     |
|---|-----|
| FIG. 7.17. Saussure's ablaut table  | 174 |
| FIG. 7.18. Saussure's table of vowel correspondences                                | 176 |
| FIG. 7.19. Laryngeals and initial vowels  | 178 |
| FIG. 8.1. Primary and secondary endings in Proto-Indo-European                      | 188 |
| FIG. 8.2. Kuryłowicz's panchronic laws of functional shift                          | 198 |
| FIG. 8.3. The passive in Maori  | 209 |
| FIG. 9.1. A simple family tree  | 218 |
| FIG. 9.2. Two-language trees  | 225 |
| FIG. 9.3. A tree for Latin and the Romance languages                                | 226 |
| FIG. 9.4. Three-language trees  | 227 |
| FIG. 9.5. Pair-wise comparisons of Germanic languages (i)                           | 228 |
| FIG. 9.6. 'Truth table' for language relationships                                  | 229 |
| FIG. 9.7. A tree for Germanic languages   | 229 |
| FIG. 9.8. Pair-wise comparisons of Germanic languages (ii)                          | 230 |
| FIG. 9.9. Four-language trees   | 231 |
| FIG. 9.10. Possible trees for Mande languages                                       | 232 |
| FIG. 9.11. Minimal trees for Mande languages  | 233 |
| FIG. 9.12. 'Truth tables' for Mande languages                                       | 234 |
| FIG. 9.13. Trees and isoglosses   | 236 |
| FIG. 9.14. Diachronic isogloss maps   | 237 |
| FIG. 9.15. Greenberg's comparison of African languages                              | 239 |
| FIG. 10.1. Greenberg's language types   | 252 |
| FIG. 10.2. The standard system of Proto-Indo-European plosives                      | 255 |
| FIG. 10.3. Gamkrelidze and Ivanov's system for Proto-Indo-European plosives         | 257 |
| FIG. 10.4. Unmarked systems with voiced and voiceless plosives                      | 258 |
| FIG. 10.5. Unmarked systems with glottalized and aspirated plosives                 | 258 |
| FIG. 11.1. Control cases for vocabulary retention                                   | 284 |
| FIG. 11.2. Swadesh's list of 100 items  | 286 |
| FIG. 11.3. Nichols's hierarchy of features based on number of gross types per stock | 295 |
| FIG. 11.4. Nichols's hierarchy of features based on number of gross types per area  | 296 |
