Preface *xiii*

Acknowledgments *xvii*

1 *Introduction* *1*

1.1 A Posteriori Error Estimation: The Setting *1*

1.2 Status and Scope *2*

1.3 Finite Element Nomenclature *4*

1.3.1 Sobolev Spaces *5*

1.3.2 Inverse Estimates *7*

1.3.3 Finite Element Partitions *9*

1.3.4 Finite Element Spaces on Triangles *10*

1.3.5 Finite Element Spaces on Quadrilaterals *11*

1.3.6 Properties of Lagrange Basis Functions *12*

1.3.7 Finite Element Interpolation *12*

1.3.8 Patches of Elements *13*

1.3.9 Regularized Approximation Operators *14*

1.4 Model Problem *15*

1.5 Properties of A Posteriori Error Estimators *16*

1.6 Bibliographical Remarks *18*

2 *Explicit A Posteriori Estimators* 19
2.1 *Introduction* 19
2.2 *A Simple A Posteriori Error Estimate* 20
2.3 *Efficiency of Estimator* 23
2.3.1 *Bubble Functions* 23
2.3.2 *Bounds on the Residuals* 28
2.3.3 *Proof of Two-Sided Bounds on the Error* 31
2.4 *A Simple Explicit Least Squares Error Estimator* 32
2.5 *Estimates for the Pointwise Error* 34
2.5.1 *Regularized Point Load* 35
2.5.2 *Regularized Green's Function* 38
2.5.3 *Two-Sided Bounds on the Pointwise Error* 39
2.6 *Bibliographical Remarks* 42

3 *Implicit A Posteriori Estimators* 43
3.1 *Introduction* 43
3.2 *The Subdomain Residual Method* 44
3.2.1 *Formulation of Subdomain Residual Problem* 45
3.2.2 *Preliminaries* 46
3.2.3 *Equivalence of Estimator* 47
3.2.4 *Treatment of Residual Problems* 49
3.3 *The Element Residual Method* 50
3.3.1 *Formulation of Local Residual Problem* 50
3.3.2 *Solvability of the Local Problems* 52
3.3.3 *The Classical Element Residual Method* 54
3.3.4 *Relationship with Explicit Error Estimators* 54
3.3.5 *Efficiency and Reliability of the Estimator* 55
3.4 *The Influence and Selection of Subspaces* 56
3.4.1 *Exact Solution of Element Residual Problem* 56
3.4.2 *Analysis and Selection of Approximate Subspaces* 59
3.4.3 *Conclusions* 62
3.5 *Bibliographical Remarks* 63

4 *Recovery-Based Error Estimators* 65
4.1 *Examples of Recovery-Based Estimators* 66

4.1.1 An Error Estimator for a Model Problem in One Dimension 67
4.1.2 An Error Estimator for Bilinear Finite Element Approximation 69
4.2 Recovery Operators 72
4.2.1 Approximation Properties of Recovery Operators 73
4.3 The Superconvergence Property 75
4.4 Application to A Posteriori Error Estimation 76
4.5 Construction of Recovery Operators 77
4.6 The Zienkiewicz–Zhu Patch Recovery Technique 79
4.6.1 Linear Approximation on Triangular Elements 79
4.6.2 Quadratic Approximation on Triangular Elements 81
4.6.3 Patch Recovery for Quadrilateral Elements 82
4.7 A Cautionary Tale 82
4.8 Bibliographical Remarks 83

5 Estimators, Indicators, and Hierarchic Bases 85
5.1 Introduction 85
5.2 Saturation Assumption 88
5.3 Analysis of Estimator 89
5.4 Error Estimation Using a Reduced Subspace 90
5.5 The Strengthened Cauchy–Schwarz Inequality 94
5.6 Examples 98
5.7 Multilevel Error Indicators 100
5.8 Bibliographical Remarks 109

6 The Equilibrated Residual Method 111
6.1 Introduction 111
6.2 The Equilibrated Residual Method 112
6.3 The Equilibrated Flux Conditions 116
6.4 Equilibrated Fluxes on Regular Partitions 117
6.4.1 First-Order Equilibration Condition 118
6.4.2 The Form of the Boundary Fluxes 118
6.4.3 Equilibration Conditions in Terms of the Moments 120

6.4.4 *Local Patch Problems for the Flux Moments* 120
6.4.5 *Procedure for Resolution of Patch Problems* 123
6.4.6 *Summary* 127
6.5 *Efficiency of the Estimator* 128
6.5.1 *Stability of the Equilibrated Fluxes* 128
6.5.2 *Proof of Efficiency of the Estimator* 131
6.6 *Equilibrated Fluxes on Partitions Containing Hanging Nodes* 133
6.6.1 *First-Order Equilibration* 133
6.6.2 *Flux Moments for Unconstrained Nodes* 134
6.6.3 *Flux Moments with Respect to Constrained Nodes* 137
6.6.4 *Recovery of Actual Fluxes* 137
6.7 *Equilibrated Fluxes for Higher-Order Elements* 139
6.7.1 *The Form of the Boundary Fluxes* 141
6.7.2 *Determination of the Flux Moments* 141
6.8 *Bibliographical Remarks* 143

7 *Methodology for the Comparison of Estimators* 145
7.1 *Introduction* 145
7.2 *Overview of the Technique* 146
7.3 *Approximation over an Interior Subdomain* 149
7.3.1 *Translation Invariant Meshes* 149
7.3.2 *Lower Bounds on the Error* 152
7.3.3 *Interior Estimates* 153
7.4 *Asymptotic Finite Element Approximation* 157
7.4.1 *Periodic Finite Element Projection on Reference Cell* 157
7.4.2 *Periodic Finite Element Projection on a Physical Cell* 158
7.4.3 *Periodic Extension on a Subdomain* 159
7.4.4 *Asymptotic Finite Element Approximation* 160
7.5 *Stability of Estimators* 165
7.5.1 *Verification of Stability Condition for Explicit Estimator* 166
7.5.2 *Verification of Stability Condition for Implicit Estimators* 168

7.5.3 Verification of Stability Condition for Recovery-Based Estimator 169
7.5.4 Elementary Consequences of the Stability Condition 170
7.5.5 Evaluation of Effectivity Index in the Asymptotic Limit 172
7.6 An Application of the Theory 174
7.6.1 Computation of Asymptotic Finite Element Solution 174
7.6.2 Evaluation of the Error in Asymptotic Finite Element Approximation 178
7.6.3 Computation of Limits on the Asymptotic Effectivity Index for Zienkiewicz–Zhu Patch Recovery Estimator 180
7.6.4 Application to Equilibrated Residual Method 184
7.6.5 Application to Implicit Element Residual Method 184
7.7 Bibliographical Remarks 187

8 Estimation of the Errors in Quantities of Interest 189
8.1 Introduction 189
8.2 Estimates for the Error in Quantities of Interest 191
8.3 Upper and Lower Bounds on the Errors 193
8.4 Goal-Oriented Adaptive Refinement 197
8.5 Example of Goal-Oriented Adaptivity 198
8.5.1 Adaptivity Based on Control of Global Error in Energy 198
8.5.2 Goal-Oriented Adaptivity Based on Pointwise Quantities of Interest 198
8.6 Local and Pollution Errors 202
8.7 Bibliographical Remarks 205

9 Some Extensions 207
9.1 Introduction 207
9.2 Stokes and Oseen's Equations 208
9.2.1 A Posteriori Error Analysis 211
9.2.2 Summary 218
9.3 Incompressible Navier–Stokes Equations 219
9.4 Extensions to Nonlinear Problems 222

9.4.1 A Class of Nonlinear Problems 222
9.4.2 A Posteriori Error Estimation 224
9.4.3 Estimation of the Residual 225
9.5 Bibliographical Remarks 227
