|---|----|
| <i>Preface</i> . . . . .  | v  |
| <i>Notation and Symbols</i> . . . . .   | ix |
| <i>Introduction</i> . . . . .   | 1  |
| <br>  |    |
| <i>I Limit Theorems for Stopped Random Walks</i> . . . . .                        | 8  |
| 1 Introduction . . . . .  | 8  |
| 2 a.s. Convergence and Convergence in Probability . . . . .                       | 10 |
| 3 Anscombe's Theorem . . . . .  | 15 |
| 4 Moment Convergence in the Strong Law and the Central Limit<br>Theorem . . . . . | 17 |
| 5 Moment Inequalities . . . . .   | 20 |
| 6 Uniform Integrability . . . . .   | 28 |
| 7 Moment Convergence . . . . .  | 36 |
| 8 The Stopping Summand . . . . .  | 39 |
| 9 The Law of the Iterated Logarithm . . . . .                                     | 41 |
| 10 Complete Convergence and Convergence Rates . . . . .                           | 42 |
| 11 Problems . . . . .   | 44 |
| <br>  |    |
| <i>II Renewal Processes and Random Walks</i> . . . . .                            | 46 |
| 1 Introduction . . . . .  | 46 |
| 2 Renewal Processes; Introductory Examples . . . . .                              | 47 |
| 3 Renewal Processes; Definition and General Facts . . . . .                       | 48 |
| 4 Renewal Theorems . . . . .  | 51 |
| 5 Limit Theorems . . . . .  | 54 |
| 6 The Residual Lifetime . . . . .   | 58 |
| 7 Further Results . . . . .   | 60 |
| 8 Random Walks; Introduction and Classifications . . . . .                        | 62 |
| 9 Ladder Variables . . . . .  | 65 |
| 10 The Maximum and the Minimum of a Random Walk . . . . .                         | 67 |
| 11 Representation Formulas for the Maximum . . . . .                              | 68 |
| 12 Limit Theorems for the Maximum . . . . .                                       | 70 |

|   |     |
|---|-----|
| <i>III Renewal Theory for Random Walks with Positive Drift</i> . . . . .  | 74  |
| 1 Introduction . . . . .  | 74  |
| 2 Ladder Variables . . . . .  | 77  |
| 3 Finiteness of Moments. . . . .  | 78  |
| 4 The Strong Law of Large Numbers . . . . .                               | 83  |
| 5 The Central Limit Theorem . . . . .                                     | 85  |
| 6 Renewal Theorems. . . . .   | 87  |
| 7 Uniform Integrability. . . . .  | 90  |
| 8 Moment Convergence . . . . .  | 92  |
| 9 Further Results on $Ev(t)$ and $\text{Var } v(t)$ . . . . .             | 94  |
| 10 The Overshoot . . . . .  | 97  |
| 11 The Law of the Iterated Logarithm . . . . .                            | 102 |
| 12 Complete Convergence and Convergence Rates. . . . .                    | 103 |
| 13 Applications to the Simple Random Walk . . . . .                       | 104 |
| 14 Extensions to the Non-I.I.D. Case . . . . .                            | 106 |
| 15 Problems . . . . .   | 107 |
| <i>IV Generalizations and Extensions</i> . . . . .                        | 108 |
| 1 Introduction . . . . .  | 108 |
| 2 A Stopped Two-Dimensional Random Walk . . . . .                         | 109 |
| 3 Some Applications . . . . .   | 118 |
| 4 The Maximum of a Random Walk with Positive Drift . . . . .              | 128 |
| 5 First Passage Times Across General Boundaries . . . . .                 | 133 |
| <i>V Functional Limit Theorems</i> . . . . .                              | 147 |
| 1 Introduction . . . . .  | 147 |
| 2 An Anscombe–Donsker Invariance Principle. . . . .                       | 147 |
| 3 First Passage Times for Random Walks with Positive Drift. . . . .       | 151 |
| 4 A Stopped Two-Dimensional Random Walk . . . . .                         | 157 |
| 5 The Maximum of a Random Walk with Positive Drift . . . . .              | 159 |
| 6 First Passage Times Across General Boundaries . . . . .                 | 159 |
| 7 The Law of the Iterated Logarithm . . . . .                             | 161 |
| 8 Further Results. . . . .  | 164 |
| <i>Appendix A. Some Facts from Probability Theory</i> . . . . .           | 165 |
| 1 Convergence of Moments. Uniform Integrability. . . . .                  | 165 |
| 2 Moment Inequalities for Martingales . . . . .                           | 167 |
| 3 Convergence of Probability Measures. . . . .                            | 171 |
| 4 Strong Invariance Principles. . . . .                                   | 177 |
| 5 Problems. . . . .   | 178 |
| <i>Appendix B. Some Facts about Regularly Varying Functions</i> . . . . . | 180 |
| 1 Introduction and Definitions . . . . .                                  | 180 |
| 2 Some Results. . . . .   | 181 |
| <i>Bibliography</i> . . . . .   | 183 |
| <i>Index</i> . . . . .  | 193 |
