

# CONTENTS

Part One. MATHEMATICAL BACKGROUND	1
1. Mathematical Models	3
2. Matrix Algebra	11
3. Markov Chains: Definitions	23
4. Markov Chains: Some Important Theorems	36
Part Two. MARKOV CHAINS MODELS	47
5. Social Stratification: Structure	49
6. Social Stratification: Process	62
7. Conflict and Its Resolution	86
8. Social Mobility	119
Part Three. GAME-THEORETICAL MODELS	149
9. Extreme Social Conflict: The Problem	151
10. The Game-Theoretical Approach	171
11. Applications of the Zero-Sum Theory	194
12. Antagonistic Cooperation: Some Nonzero-Sum Games	222
13. Principles of Justice: The Nash Solution	238
14. Application of the Nonzero-Sum Games Theory	267

Part Four. PROBLEMS OF MODEL CONSTRUCTION	297
15. Descriptive and Normative Models	298
16. Construction and Function of Models	315
Appendix. Estimated Transition Probabilities in Cohen's Model	333
Bibliography	339
Index	343
