Introduction	1
<i>Jonathan Harrington and Marija Tabain</i>	
PART 1: MODELS	11
1 About Speech Motor Control Complexity	13
<i>Pascal Perrier</i>	
2 A Neural Model of Speech Production	27
<i>Frank H. Guenther, Satrajit S. Ghosh, Alfonso Nieto-Castanon, and Jason A. Tourville</i>	
3 Distinctions Between Speech and Nonspeech Motor Control: A Neurophonetic View	41
<i>Wolfram Ziegler</i>	
4 Neural Processes Underlying Speech Production of Native and Non-Native Phonetic Contrasts	55
<i>Daniel E. Callan</i>	
5 Production and Perception of Phoneme Contrasts Covary Across Speakers	69
<i>Joseph S. Perkell, Frank H. Guenther, Harlan Lane, Nicole Marrone, Melanie L. Matthies, Ellen Stockmann, Mark Tiede, and Majid Zandipour</i>	

6	3D Biomechanical Tongue Modeling to Study Speech Production	85
	<i>Jean-Michel Gérard, Pascal Perrier, and Yohan Payan</i>	
7	Prediction of Geometrical Vocal Tract Limits from Bony Landmarks: Modern Humans and Neandertalians	103
	<i>Louis-Jean Boë, Jean-Louis Heim, Denis Autesserre, and Pierre Badin</i>	
8	A Physiologically Based Model of Perioral Dynamics for Various Lip Deformations in Speech Articulation	119
	<i>Hiroaki Gomi, Jyunichi Nozoe, Jianwu Dang, and Kiyoshi Honda</i>	
9	Analysis of Audiovisual Speech Intelligibility Based on Spatial and Temporal Filtering of Visible Speech Information	135
	<i>Hugo de Paula, Hani Camille Yehia, Douglas Shiller, Gregoire Jozan, Kevin G. Munhall, and Eric Vatikiotis-Bateson</i>	
10	What Role Does the Palate Play in Speech Motor Control? Insights from Tongue Kinematics for German Alveolar Obstruents	149
	<i>Susanne Fuchs, Pascal Perrier, Christian Geng, and Christine Mooshammer</i>	
PART 2: PHONETICS AND CROSS-LINGUISTIC ANALYSES		165
11	Phonetic Encoding of Prosodic Structure	167
	<i>Patricia A. Keating</i>	
12	Australian Aboriginal Languages: Consonant-Salient Phonologies and the “Place-of-Articulation Imperative”	187
	<i>Andrew Butcher</i>	
13	Devoicing of Word-Initial Stops: A Consequence of the Following Vowel?	211
	<i>Daniel Pape, Christine Mooshammer, Phil Hoole, and Susanne Fuchs</i>	

14	Articulatory and Acoustic Correlates of Contrastive Focus in French Children and Adults	227
	<i>Lucie Ménard, Hélène Løevenbruck, and Christophe Savariaux</i>	
15	Temporal and Spatial Correlates of Quantity Contrasts in Wolof Acoustic, Kinematic, and X-Ray Data	253
	<i>Rudolph Sock, Béatrice Vaxelaire, Johanna-Pascale Roy, Véronique Ferbach-Hecker, and Fabrice Hirsch</i>	
16	Laryngeal Adjustments in the Production of Voiceless Obstruent Clusters in Berber	275
	<i>Rachid Ridouane, Susanne Fuchs, and Phil Hoole</i>	
	PART 3: TECHNIQUES	299
17	Assessing Magnetic Resonance Imaging Measurements: Effects of Sustenation, Gravitation, and Coarticulation	301
	<i>Olov Engwall</i>	
18	Predicting 3D Tongue Shapes from Midsagittal Contours	315
	<i>Maureen Stone, Melissa A. Epstein, Min Li, and Chandra Kambhamettu</i>	
19	Observation of Tongue-Larynx Interaction Using Improved MRI Techniques	331
	<i>Sayoko Takano, Kiyoshi Honda, and Shinobu Masaki</i>	
20	Morphing Generic Organs to Speaker-Specific Anatomies	341
	<i>Maxime Bérrar, Gérard Bailly, Matthieu Chabanas, Michel Desvignes, Frédéric Elisei, Matthias Odisio, and Yohan Payan</i>	
	Author Index	363
	Subject Index	371
