

Contents

Preface v

Acknowledgments vii

1. Introduction to Anaerobes	1
2. Anaerobes as Part of the Human Indigenous Microbial Flora	13
3. Collection, Transportation, and Processing of Specimens for Culture	25
4. Clinical Clues to Diagnosis of Anaerobic Infections	35
5. Virulence of Anaerobic Bacteria and the Role of Capsule	43
6. Neonatal Infections	53
7. Bacteremia and Septicemia in Newborns	61
8. Necrotizing Enterocolitis	69
9. Infant Botulism	79
10. Central Nervous System Infections	87
11. Ocular Infections	95
12. Odontogenic Infections	103
13. Ear Infections	119
14. Sinusitis	135
15. Mastoiditis	155
16. Tonsillitis, Adenoiditis, Purulent Nasopharyngitis, and Uvulitis	161
17. Infections of the Head and Neck	181
18. Actinomycosis	203
19. Mediastinitis	209
20. Pulmonary Infections	215
21. Other Chest Infections	223

22. Intra-abdominal Infections	233
23. Urinary Tract and Genitourinary Suppurative Infections	245
24. Female Genital Tract Infections	255
25. Cutaneous and Soft-Tissue Abscesses and Cysts	267
26. Soft Tissue and Muscular Infections	275
27. Burn Infections	289
28. Human and Animal Bite Wound Infection	297
29. Infection in Solid Tumors	307
30. Joint and Bone Infections	313
31. Pseudomembranous Colitis	325
32. Anaerobic Bacteremia	331
33. Endocarditis	335
34. Pericarditis	341
35. Botulism	345
36. Tetanus	353
37. Antibiotic Resistance of Anaerobic Bacteria and Its Effect on the Management of Anaerobic Infections	359
38. Treatment of Anaerobic Infections	387
